Subject: ITT SSA Reponse File Results
Date: Wednesday, May 23, 2018 11:20:57 AM
Attachments: [SSA_Borrower_Defense_Return_5222018.xlsx](#)
Importance: High

Good Morning,

I have downloaded the earnings response file from SSA and have checked the summary data. Please see below findings:

- The summary income data is provided for 30 groupings based on the SSA check on 3,196 individuals.
- SSA was able to match 3,169 individuals in their system for a match rate of 99.2%.
- 247 individuals were matched to zero earnings records.
- SSA was not able to match 27 individuals.
- One program did not meet the threshold of 10 individual in order for SSA to return earnings data.

The summary results are attached. As Erik has done in the past, I extracted the OPEID, CIP code and Credential Level from the control key.

The password will be sent in separate e-mail shortly. Let me know if there any questions or concerns. Thanks.

Best,

Brent

Subject: RE: GE Data for SSA submission
Date: Monday, October 2, 2017 9:28:18 AM
Attachments: [ssa_for_bd_earnings_return.xlsx](#)

I have downloaded the earnings response file from SSA and have checked the summary data compared to the input file we sent and everything appears to be reasonable.

The summary income data is provided for 79 groupings based on the SSA check on 61717 individuals. SSA was able to match 61256 individuals in their system for a match rate of 99.25%. Of the 61256 individuals matched, 7345 individuals were matched to zero earnings records. SSA was not able to match 461 individuals.

I confirmed that student counts for the individual groupings match the details that were sent to SSA. The summary results are attached. I extracted the OPEID, CIP code and credential level from the 16-character control key.

P'word sent separately.

Erik
