

To Whom It May Concern,

I would like to share my educational experience at ITT in Newburgh, Indiana. I attended the (b)(6) I graduated at the top of my class and was inducted to the National Honors Society. Before attending ITT I was a high school drop-out, but received my (b)(6) and went to IVY Tech for one year. During my time at IVY Tech I began research into various nursing programs in the local area. I found ITT was exactly what I was looking for in a program, small class sizes, great location, knowledgeable instructors, and a variety of resources available.

ITT has made me the (b)(6) I am today. My classroom experience allowed me to learn the basics of my (b)(6) and shaped my critical thinking skills. The instructors I had truly cared for their students and myself, these instructors went above and beyond their job description to provide an opportunity for all students to succeed, in and out of the classroom. The clinical education opportunities provided were rich with hands on skills, real life problem solving, and provided the essential education I have relied on as an (b)(6)

I feel that the most important part of my education was not the classroom work or even my clinicals, but the guidance and encouragement I received from the instructors, campus director, staff, and the LRC staff. (b)(6) (b)(6) and many more, taught me to be confident, how to study, and most of all how to be a (b)(6) Without the staff at ITT, I would not be the success I am today.

May 3, 2016

Since graduation I passed my boards and accepted a position at (b)(6) (b)(6) as a (b)(6) I am currently continuing my education through (b)(6) to attain my (b)(6) in (b)(6) my graduation date is set for (b)(6). My goal is to complete my education and to give back to ITT as an instructor and continue my role as a (b)(6) ITT did more than give me an education, the people at ITT gave me a future.

Thank you for allowing me to share my experience with ITT. I appreciate your time and hope this letter allows others to see how wonderful the campus and staff are at ITT Newburgh, Indiana.

5/3/2016

Dear to whom it may concern,

When I first was concerned about continuing education after almost 20 years away from school, I was definitely frightened. I knew that the world was passing me by and I had to do something for myself, as well as be an example for (b)(6). As a (b)(6), I know firsthand how tough the workforce can be and something had to be done not only for my children but for myself. After reviewing several technical colleges which seemed to be more my speed with two jobs and (b)(6) something about ITT touched me. As small as this institution is, it gave me comfort to know that there would be more individual attention and that I wouldn't get lost in the crowd. Upon talking with recruiters and meeting some of the old alumni with success stories, I was sold. Nervously attending my associate's courses, I was very impressed with attention to detail that instructors had noticed that not all students here were kids fresh out of high school. These were people my age and older looking to better themselves in an environment that met requirements that we could all still hold our jobs, provide for our families, and still receive a quality education. After two years of critical thinking and adapting my life to bettering myself in a field of electronics technology, I feel that the knowledge, friends, and experience gained would carry me further in life than I ever thought possible.

ITT has so much to offer when it comes to help with homework and many resources, such as computer labs, virtual libraries (for research), and I will never forget the instructors and staff for their tireless efforts to meet with us before or after school to ensure that we understood what we were

learning. When I graduated with an associate's degree with highest honors, I wanted more, the hunger for knowledge and direction in life was exhilarating. During my term in the associates, career services aided in my search for the ideal career for me within my area. With so many options in hand, it gave the opportunity to be the picky one and not settle for what's left. ITT had set me up with (b)(6) (b)(6) which has utilized my skills, and even evolved my education to surpass what I thought I was capable of. I am now a (b)(6) which requires assembling, tuning, and creating new RF filters for TV, FM, and cellular communications globally. I am also (b)(6) in my department in as little as two years. Knowing that I still wanted more from myself educationally, and in constant contact with ITT to have available a bachelors program in electronics technology, in which I am currently enrolled, the sky's the limit. I am truly blessed to take the leap for self-betterment, and not to only look for a job but to find a career that may last a lifetime.

I am forever indebted to ITT and the staff for not discouraging my path on a better future not only for me but for so many others that have that same desire. I greatly appreciate the chance to voice my heart for this life changing educational experience, which hands down exceeded my greatest expectations and continues to do so.

Deepest regards,

(b)(6)

Stanley Hatfield (b)(6)

To Whom It May Concern:

The purpose of this letter is to discuss my educational experience at ITT.

I am a graduate of the (b)(6) at ITT in Newburgh, Indiana. I was part of the second class in this new program. If you ask any (b)(6) they will tell you that (b)(6) is full of stress and lots of tears. They will also probably tell you that faculty can make this difficult journey better or worse. A lot of (b)(6) will share that nursing instructors seem to feel that it is their job to make it harder. What I found at ITT with our instructors, was that they wanted each of us to succeed. They made themselves available to us no matter what our questions or problems may have been. They shared our tears and our achievements each step of the way. Our classes were always filled with learning and opportunities to grow as future (b)(6) and colleagues.

Since graduation in 2011, I have completed my BSN and MSN. I am a (b)(6) at (b)(6) (b)(6) I plan to further my education and continue to reach higher, as I was shown was possible through wonderful role models at this school.

Thank you for allowing me the opportunity to share my positive experience at ITT.

(b)(6)

Melissa Maxwell, RN, MSN

Wednesday May 4, 2016

To Whom It May Concern,

I am writing to share with you my personal educational experience at ITT Technical Institute in Newburgh, IN. I am a (b)(6) graduate of the (b)(6)

(b)(6)

I am currently employed with (b)(6) and hold a full-time position as a

(b)(6)

I have been

employed concurrently with this company and at this facility for approximately 3.5 years.

Upon graduation I transitioned into my role as a

(b)(6)

as a (b)(6)

I strongly feel that the education I obtained from ITT Technical Institute readied me for my current career as a (b)(6). There are many aspects of my schooling that personally aided me throughout my time at ITT Tech. If not for the educated staff, individualized instruction and mentoring I received, hands-on clinical and classroom experience and the challenging curriculum, I do not believe that I would have been so well prepared for my current career. The staff and (b)(6) instructors at ITT Tech were outstanding. Everyone whom I had the pleasure of learning from went above and beyond to ensure that I was provided with the best education attainable. Whether I required further explanation on a lesson, assistance acquiring materials for a research paper, or additional guidance in the clinical setting, all of my instructors were knowledgeable, accommodating and amiable.

It is a compilation of the quality education I received, the support of my classmates and instructors, along with my hard work and dedication to achieve my personal goal of becoming a (b)(6), to which I owe my current success to.

I greatly appreciate the opportunity to share my personal educational experience with you. Thank you for your time.

Respectfully

(b)(6)

Lorraine L. Mayes

Jerry L. Smith

(b)(6)

To Whom It May Concern:

My name is (b)(6) and the purpose of this letter is to talk about my educational experience at ITT. My experience at ITT has been for the most part very positive. As with any school and student relationship, there have been some minor problems with class scheduling. The staff at ITT has been very helpful when assisting me with those types of problems. When I have come to them with my scheduling conflicts, they have treated my problem as if it was their own and worked to solve it quickly. The open door policy from the top down really holds true at my school.

When I started my college career four years ago at ITT, I was (b)(6) and working full time as a (b)(6). During this time I was also trying to get my own tree service company started. I was concerned that my age and time constraints would be a problem. Those concerns were quickly mitigated during my new student orientation. During the orientation I was welcomed to the school in a way that made me feel like my education was important to them. One of the main benefits of attending ITT is that the number of students in each class is relatively low. The small class size allows for more hands-on communication between the students and the instructors. The instructors I have had while attending ITT have been exceptional and the instructions I have received from them has given me the confidence to succeed in my field of study. The educational resources provided by the school like the labs and the LRC have been incredible. The LRC (learning resource center) at ITT is staffed with quality knowledgeable people that have played a large role in my success at this school.

Thank you for allowing me the chance to talk with you about my experiences at ITT. Now that I am nearing graduation, I am positive I have made the right choice attending ITT Tech.

Sincerely,

Jerry L. Smith

(b)(6)

ITT Technical Institute, Newburgh Indiana campus

May 2, 2016

To Whom It May Concern:

I am writing this letter to share my experience at ITT Technical Institute. I am a student at the ITT Tech campus in Dayton, Ohio.

Since I have been here, I have learned a lot from my instructors about my field of study which is (b)(6), and also about life in general. Our group theory class just completed a Build a Bear project that provided bears for children who are patients at Dayton Children's Hospital. This project taught me the value of giving back to the community and to be thankful that (b)(6)

I will be graduating on (b)(6). The education I have received from ITT Technical Institute has prepared me for the position of (b)(6) that I start on May 9th. This job will not only provide the opportunity to apply the education I have learned while attending ITT Technical Institute but also to help provide for my family.

I appreciate everything that the staff and faculty have done during my time at ITT Tech. I have received support to help me achieve my goal of being a college graduate and get a good job in my field of study.

Sincerely,

(b)(6)

Christopher Ryan

(b)(6)

May 3, 2016

To whom it may concern,

My name is (b)(6) and I will be graduating from ITT Technical Institute in (b)(6). I will be graduating from the Dayton campus with a degree in (b)(6). I am now working at (b)(6) in their B&O or build and overhaul department.

My time at ITT Tech has been a hard one, but I would not change a thing about it. The long nights at class and then the homework. The days of class for me were waking up at 04:00 to get ready for work, and not getting to bed until around 01:00 the next morning to do it all over again. On three days out of the week I did not see (b)(6). But again I would not change a thing because I now have a great job thanks to our wonderful person in the career services department. Melinda took the time to help me find not one but two jobs. The second being more representative of my degree.

These last two years have been long but yet rewarding I have been a part of a few clubs at ITT Tech. I am the President of NTHS, was the Vice President of the ITE club and have also helped out with repairing radios for Goodwill Easter Seals for one of their programs to help out the blind and hard of seeing client's. I have grown a lot from my time here at ITT tech. I went from having a not so desirable job to one that I really enjoy, and from not really liking were I was in my life to having time to spend with my family and not having to worry about how I'm going to pay my next bill.

Thank you ITT Tech.

Respectfully yours,

(b)(6)

Kenneth Brown

May 2, 2016

To whom it may concern,

My name is (b)(6) and I am a graduate of ITT Technical Institute. I graduated from the Dayton Campus in (b)(6) with a degree in (b)(6). I am now a (b)(6) for (b)(6)

ITT Technical Institute was a wonderful experience and I am forever grateful for the things that I have taken from this time in my life. Not only was the staff knowledgeable and helpful in the classroom, they also take an additional interest in who individuals are on a personal level, which is an everlasting impression.

Three days following graduation (b)(6) I was able to continue working full time as well as attending school full time to accomplish my goals and make a better life for my son and me. Eight weeks after (b)(6) I was scheduled for my first interview in the professional world as a graduate with the help of the career services department. Not even a week later, I was offered the position. I would not be where I am today if it was not for the education and resources ITT Tech provided.

When I was given the opportunity to express my gratitude, I accepted without hesitation. For the first time in my life, I not only enjoy my job, but feel as if it is absolutely perfect for me and look forward to what I can do for my company. The education that I obtained was appropriate and accurate for my job field and I love to incorporate it into my everyday life.

Thank you ITT Tech!

Respectfully yours,

(b)(6)

Wesseier, Kaitlyn

May 2, 2016

To Whom It May Concern:

I am writing this letter to share my experience at ITT Technical Institute. I am a student at the ITT Tech campus in Dayton, Ohio.

I have learned a lot from my instructors about my field of study which is (b)(6)

(b)(6) I am currently working in my field as a (b)(6)

with (b)(6) that I started on March 28, 2016. This is my second job in my field, the first being a job through a temporary agency that gave me the student professional experience and helped me get my current job.

While here at ITT Technical Institute, I was able to meet new people and acquire new skills that benefit me in my job. I also learned communication skills that are necessary in a professional environment. I appreciate everything the faculty and staff at ITT Tech Dayton have done to ensure my success both in education and life. I don't graduate until (b)(6) and have been able to secure a job that will help me exceed my goals in life.

Sincerely,

(b)(6)

Thomas Manoussakis

To Whom it may concern,

In reference to ITT Technical Institute of Dayton Ohio, located at 3325 Stop 8 Rd, Dayton, OH 45414 educational accreditation, I would like to express my opinion as to why they should be considered to continue to have this certification.

My name is (b)(6) I attended (b)(6) and am now employed at (b)(6) as a (b)(6)

(b)(6) I am so proud to have this title and to be employed by this company. None of this could have been possible for me to achieve without ITT and all the staff members that I encountered along the way.

When I entered ITT in the Spring quarter of 2015, I had been working in the food industry and desperately needed to turn a new leaf for myself and family, (b)(6) its hard on minimum wage. Before I started ITT, I possessed no real professional traits except knowing how to carry myself and dress for the occasion. ITT changed all of this for me. In the classes that are required for everyone to take, I learned how to be a professional and communicate at a professional level. The knowledge that I took home was vast, complete and on a fast track but, the instructors where prepared for our questions, problems and obstacles. Teaching in a fast track environment the instructors balanced the students that caught on and the ones that needed more help, well.

In my fifth quarter career services arranged an interview with (b)(6). To get me ready for this interview I had classes that taught the basic skills of an interview and what employers look for. Nothing helped more than the Career Services staff, mainly Ms. Melinda Jefferies. Before my interview we sat down and did a mock interview, made sure I was ready for the occasion, and she even gave me tips that I had never heard of. The best example is to research the company, try to know more about them then they may know about themselves. She always seemed to make herself be available if anyone had questions about an upcoming interview. We also did mock interviews in another one of our classes.

ITT education and everything they offered was absolutely a pleasant experience and they readied me for every aspect of my career change from education to the interview. I would recommend this school to anyone thinking about changing their life.

This school would not be able to continue to change lives like mine if they cannot continue to carry this accreditation. Please feel free to contact me with any questions about my experience with ITT and their faculty.

Sincerely,

(b)(6)

Lauren Maloon

(b)(6)

The thing I like most about ITT-TECH is the hands on training, the labs really help you get a perspective of how too visually, and mentally complete what you have learned. The instructors are more than willing to help in any situation. They are very helpful and courteous in class and out. The training we receive here will help with our career choice. The materials needed to do your labs and research papers are at your disposal. Instructors are even willing to come in on their off time to help students if needed.

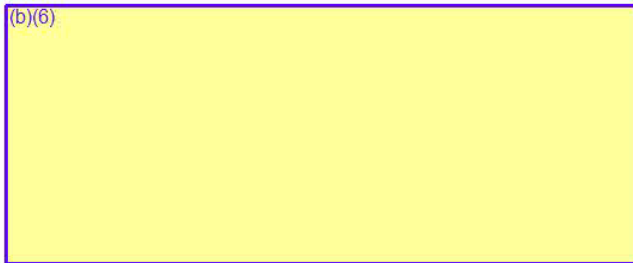

5-3-16

(b)(6)

What I like about ITT is that you don't only learn by listening but by doing. I like that they are hand on training. The staffing at ITT are very nice and friendly. They are always greeting you with a smile. I like that classes are not to full so that way the teacher can help you if you need. ITT provides a safe and quit lab space for you to work in. ITT is a good school to attend they have a good staff and is a very safe place. What I also like is that ITT offers you enough time to get your work done and still have a life outside of the class room. I always feel welcome and stress free when walking through ITTs doors.

(b)(6)

5-3-2016

What I like about ITT is that the Teachers are really nice. I like that they will go above and beyond to help you to make sure that you understand what you are doing. I like that they reach out to you to let you know if you are falling behind or let you know what they think you need to work on. I like that most classes are two week modules so it helps you to have a life, work, and still make sure you have time to do your work for class.

I like that ITT is available for you when it is needed. The labs are quit and is a good place for you to do work and study at. Also as studying (b)(6) I like that the labs with the equipment is available for use whenever you need.

I feel that ITT is a good school to attend because not only are the facility and staffing nice but the students are also very nice. ITT to me just puts off a happy and friendly vibe that I like. I like that I can come to class and not be judged on what I do or don't know.

(b)(6)

5/3/16

Derrick Martin
5-3-16

Dear Mr. Kent Walker,

I must say that being at this school has given me an opportunity for a future and not just a "job", a career, which will be beneficial for my family in the years to come. ITT-Tech has shown me that I can learn something new, useful, and can be a successful career. This is my reason for attending ITT-Tech. The teachers that I have had for the most part were very knowledgeable about the topic that they taught, the hands on training in the labs are useful tools for you to take with you after graduation, the software available to us, and the books that we are given are some great tools.

(b)(6)

May 4, 2016

To whom it may concern.

ITT/Breckenridge school of (b)(6) has truly been a blessing to me. I had pondered in the past about furthering my education from a (b)(6) for many years. The biggest obstacle for me is that (b)(6) and needing to maintain my full time employment status for insurance purposes. This school offered the flexibility I needed to further my education.

Not only was the class flexibility found at this institution but a wonderful nursing faculty that has invested themselves in their students. As with any higher education facility there are always hurdles, struggles and growing pains, but overall I am extremely grateful and pleased with the education I have received thus far.

Thank you for your time.

Christine A. Harber N.S.

(b)(6)

To whom it may concern,

I am a (b)(6) student in my senior quarter and I just want to say that I have had an overall positive experience in this program.

I believe this campus has a very valuable group of staff beginning with the admissions team. Brandy has always been very courteous and helpful to me as well as Linda Lynn.

The librarian Tammy is very helpful and knowledgeable.

The nursing instructors are all amazing, smart and very dedicated to teaching us everything we need to succeed and pass our boards. I am so glad I was a part of Gretchen's class and clinical experience. I learned so much from her not only as an instructor, as a (b)(6) but also as a human being, she is amazing. I also want to acknowledge Marie, she is a very thorough and very knowledgeable (b)(6) instructor. This school has a lot of key people to keep the program afloat.

Thank you,

(b)(6)

Bernarda P.

May 3, 2016

To whom it may concern:

Hello. I'm Sarah Coffield, a student at ITT Tech (Fort Wayne Campus), (b)(6)
What I really enjoy about our school is the student focused teaching that stems from the compassionate instructors we have. One particular instructor, Gretchen Jenkins, is very passionate about seeing each nursing student succeed in that they provide the utmost care to future patients and are accountable for going above and beyond the expectations of nursing. Also, each person that makes up the campus body (staff), is very helpful in helping each student understand and reach their potential. The smaller classes are better for student involvement and understanding. We truly have very good instructors that are shaping our future, and that is what counts!

Sincerely,

Sarah Coffield,

(b)(6)

Student

ED-000020

To whom it may concern,

As a nursing student at ITT-Tech Fort Wayne I am pleased with my education. The instructors care about their students above and beyond passing and failing. I have had instructors tutor me when needed, and celebrated my victories throughout. It is nice to not just be a number in terms of my learning. All of the (b)(6) instructors know my name regardless if I have had them as a teacher. The program is a difficult program as all (b)(6) schools, but this being said, it is a structured (b)(6) program. In the clinical setting, (b)(6) professional are pleased to see our clinical group come though. It is not uncommon to overhear (b)(6) on the floor talk about our school in high regards. I am a fulltime (b)(6), and student. ITT makes school "do-able."

Thank you for your time

(b)(6)

Anna Johnston (b)(6)

To Whom It May Concern,

Hello, my name is Shondeen Miller. I am currently a student at ITT Technical Institute. I am in my Bachelor's degree for (b)(6) at the Murray Campus in Utah. I am employed at (b)(6) (b)(6) ITT Technical Institute has helped me change my life and way of living through starting my Associates in (b)(6) (b)(6) I then graduated with my Associates Degree in (b)(6). They helped me find a job shortly after graduating. I had and still have very knowledgeable instructors teaching me the course materials and was very impressed with how much I picked up from them. Before my associates degree I was not making the money I wanted to be making, knowing that I could be making more. I (b)(6) towards the ending of my degree, and knew if I kept up my work I would graduate and find a good job I could (b)(6) with. I stuck with it and graduated on time. It has made me more comfortable knowing that am able to (b)(6) (b)(6) because of my degree I got here at ITT. With my associates degree I had a very good experience with the instructors that taught here and the staff. Now with my newest instructors I am still very pleased with the way they teach and how informative they are by including real life experiences with what they discuss. They always kept me up to date with my F.A.S.F.A and other activities around the school. I was always able to get a copy of my books for the upcoming quarter, and if they didn't have it in stock at the time, they would order more so that when classes did start, I was prepared with the right materials. The instructors were easy to work with and very understanding. They are committed to what they teach and how they taught it. I would have to say my main classes that pertained to the degree were very fun and exciting, the instructors made it even better, the other classes were helpful in preparing us for the next set of

classes to come. They knew what they were talking about and were very in-depth with what the students should know before taking a test. The computers were pretty good at allowing us to use the different applications and internet to get our homework done. When I had questions about anything a majority of the instructors could give me an answer, and this made it even easier to want to talk to any and all instructors. I really am very happy I got my degree here at ITT, they are willing to work with me or anyone else looking to get a degree, in spite of my lack of funds, which is why I used F.A.S.F.A, and still graduated. I will be graduating with my Bachelor's Degree next.

Thank you, ITT Technical Institute.

(b)(6)

Shondeen Miller

To whom it may concern,

My name is Connie Blake and I am a current student. I attend school on the Murray campus and am currently employed by (b)(6)

I enjoy going to ITT Tech because it's very hands on in labs as well as bright instructors. I have learned a lot in the field where I had no previous knowledge. Career Services was very helpful in finding a job. IT Support has been very helpful in fixing my laptop and finding textbooks. The academic support has been very useful during the first year of school explaining and simplifying some of the classes. Library Support has been helpful in finding key things for reports.

Attending classes every week has expanded the horizons and created better opportunities for me and my family's life. The family will hopefully be glad to have me out of school, spending more time making a living, and afford more things.

Thanks for the great opportunity, I will be back for the bachelor's degree,

(b)(6)

Connie Blake

May 3, 2016

To whom it may concern:

I write you this letter giving you incite in going to ITT-Tech for your education. First things first, ITT-Tech is like no other school out there. I have tried other schools before getting my degree from ITT-Tech in (b)(6) from the Murray Utah campus. The one thing that I loved about the instructors is that they do have an 8-5 job in the field that they are teaching. There was not a class period that didn't go by that the instructor talked about what they did that day and how this class is going to help us out. To this day I still keep in touch with some of my instructors and ask them questions. When I graduated in (b)(6) I had a job in the field with one of the bigger (b)(6) in the state. Come to find out that most of the (b)(6) come from the Murray campus. With my current job I am able to manage our drafting firm work load and our standards. At (b)(6) (b)(6) we also look at ITT-Tech first for any (b)(6) before we go anywhere else. We have been happy with the people that have come out of ITT-Tech.

If there is anything that you get out of ITT-Tech it will be one of the biggest network of people that are more than willing to help you succeed in your professional carrier. I can go to the Murray campus anytime and talk to carrier service or even my recruiter even though it's been 5 years since I went to school. I have made great friends for Amy Jepson, recruiter, to the Director of the campus. All of them always ask how they can help students. I have been asked to be on their Advisor committee that meets twice a year, to discuss how they can better prepare students for their carriers.

I hope this has helped you in understanding how ITT-Tech in Murray has helped me out in my life and carrier.

Sincerely

(b)(6)

Shadd Johnson

(b)(6)

Hi, my name is Siniholani S. Talanoa and I am a successful alumni from ITT-Technical Institute. In (b)(6), I received my (b)(6) and it has been a ride of my life since then!

Right after graduation, I started as an (b)(6) and starting at that position I was able to double my salary. The (b)(6) at the time was blooming and going strong. The demand for (b)(6) were on the rise! If I didn't take on the challenge in gaining an education through ITT-tech, I honestly wouldn't have been as prepared to take on the high demands and challenges the oil field had to offer at the time. I was able to negotiate my time and salary due to the degree I had. Just being able to have a degree in my current field, I now had a voice. As I walked around my team members I was able to receive a greater respect just because of the position I held and the tremendous sacrifices that I went through achieving my degree, pays off at the end! My whole life I was treated as the muscle of the group. I was told to lift here, lift there and take on challenges that were physically demanding that I could feel the wear and tear as I would return home. After great sacrifices for 4 years attending ITT-Technical Institute, I am able to stand above the tough physical labor and take on higher and greater challenges using my brain muscles. Executing and exercising the knowledge obtained during those long nights in lab and trying to figure out solutions during late hours. No matter how painful, it actually strengthens your brain and prepares you mentally to make complicated decisions and solve complex problems when your body is physically drained.

As the (b)(6) was taking a dive, so were the hours and soon, the company (b)(6) shutdown on a Thursday, I called an individual that I had the privilege to meet with previously about another job and we arranged a meeting on the Monday coming up. I moved my family back to the valley that Friday, had that meeting on Monday and was hired the next day as a (b)(6). In all honesty, I wouldn't have been capable of pulling that off with just a high school diploma. I currently work for (b)(6). I overlook the production team and lead group and team meetings every week. I manage their inventory and find solutions to minimize costs and fixing machines on their first visit by assisting techs with troubleshooting skills and different ways to approach problems and symptoms. All of these were knowledge and skills that I always had, but ITT-Technical Institute opened multiple doors to where I was able to channel them and focus on my weaknesses and strengthen them which gave me strong confidence that I am able to strengthen further weaknesses down my career path.

I would like to thank ITT-Technical Institutes staff and instructors for taking the time and energy to help assist me become the man I am today. I am a better and more confident person, employee, father and husband due to the teachings of all those there! I highly recommend ITT-Technical Institute to anyone that are willing to become a better, stronger and reliable person everywhere that you may reside! Knowledge is truly Power!

(b)(6)

To Whom it May Concern,

I am currently attending classes at the Murray, Utah campus. While I have been attending class as your school, I have developed a great number of new skills that I currently use in my work position and have begun a career into (b)(6) and it is no small part to the teachers, the class curriculum, and the great support and help of the career center.

I know for a fact that my choosing your school to educate me over the local Universities was the best decision I could have made for both myself and for my wife and two sons. With the education I received at your school went way beyond the typical associates' degree level classes then anything I could have had at this level at any other school. And, I am confident that I would not be working in my field of study if it had not been for ITT-Tech's help. The teachers there are fantastic and informed, and I was able to see first-hand the difference between being taught by someone who is just an educator, or by someone who is actually working in the field that they are teaching.

Truly, your school is unique and super effective in your techniques and methodology, and I applaud you for educating students the right way!

Sincerely,

(b)(6)

May 2, 2016

To Whom It May Concern:

I am Mathew Foster, a student at ITT Technical Institute in Murray, Utah. I am currently in the process of working on completing my Associates Degree in (b)(6). I have enjoyed being able to associate with many wonderful instructors that take the time educate me on the concepts that are taught. They have taken the time on several occasions to tutor me one-on-one to help me understand the material.

At the beginning of my studies, I went and talked with the career center to help me find a job in my field of study at ITT. They requested some information from me and went to work looking for entry level positions in my desired field. My field is not easy one to get into, but with the dedicated of the career center, I was able to be success in finding a job as a (b)(6) before I have even graduated with my degree.

I do highly recommend ITT Technical Institute Murray Campus because of the dedicated of the staff helping student find success with learning the material to help them find a job in the field of study. The only way that a student does not succeed, is when they do not put forth the effort to learn.

Sincerely,

(b)(6)

Mathew Foster

Melony Peacock

Breckenridge School of Nursing

ITT-Tech

May 4, 2016

I started the (b)(6) program at ITT-Tech in September, 2014. I like the program because it is a small environment and I like the interaction I have with the instructors. The instructors want us to succeed so I am not intimidated to ask for help. The instructors are available for any help we may need and they encourage us to seek out help. Early in the program we were introduced to care plans and that was helpful because it prepared me for the work we were going to do once clinical started in the fourth quarter. The instructors have encouraged us to start preparing for the (b)(6) from the very beginning. I like the access we have to virtual library and the availability of the librarians any time I have questions and need help with a research project. The experience I have had in the nursing program is overall good. I am looking forward to graduating and becoming a registered nurse as I have always dreamed. The nursing program is helping me to achieve my goal.

(b)(6)

I'm a student currently enrolled in the (b)(6) program at ITT Technical Institute in Earth City, MO. My experience here at this facility as a student is AMAZING. Every one of my instructors both (b)(6) and general education have prepared me to where I will be successful in the field of my studies. I have been offered a job with the facility that was of my choosing and I'm proud to say that I owe a lot of that to the very staff at ITT Technical Institute in Earth City, MO who helped groom me to be the confident (b)(6) that I know I will be. We are asked in our surveys if we would recommend this school and program to others and my answer is always yes. The entire staff works well together and in a timely and professional manner.

Sincerely

(b)(6)

May 2, 2016

To whom it may concern,

I am writing in regards to my educational experiences while attending ITT Technical College in Earth City, MO. I feel that the overall experience was a success. I came in with very little education, having barely graduated from High school and through great guidance I became a great student. I received one-on-one guidance on various occasions throughout my years at ITT, and was very grateful for the instructors that took that extra step and making sure that I was able to succeed. I became a better speaker and more confident business person and have landed a career at (b)(6) as a (b)(6) which has brought me great success over the past year. School was a struggle at times, but can honestly say that the long road was worth the wait. I have gained so many important life skills that are enabling me to succeed within the company, if I had not attended college, I do not believe I would be where I am today.

Respectfully,

(b)(6)

Patrick Edwards

5/2/16

To Whom It May Concern:

My name is Steven Clark, and I am a Bachelor's student at Earth City, Missouri. I am working on my (b)(6) degree. I wanted to express my personal experience here at this collage.

I would say my experience has been positive and negative. For me, the positives has been my instructors, advisors and my chair head. Most of my negatives has been from outside of the school. You see, here I have learn and grown as a student. I originally had no back ground in electronics and found myself interested. I pushed and worked here and have succeeded more than I thought possible at the beginning, being the top student in my class. I have a full time life of a (b)(6) a full time job as a (b)(6) and being a student. Only ITT would allow me this schedule. For me personally I went to SIUE and did enjoyed my time there however here, the smaller classes and hands on makes a huge difference for me.

The negative is from the outside. I have herd and dealt with other people calling ITT isn't a real school and not a real degree. That assumption infuriates me, I know the time I put in here. The late nights and burning the candle at both ends. The experiences I have had here, and the good friends I have made. It insults me when people think that way about this place. The place that helped me find my first real job in the field of electronics, or the first step in this exciting new career.

When I started, I set a goal for myself that I would come here and do so well that my story would be worth an ITT commercial that I saw on TV before. That I will make the most of every moment here and build a life with the education here as one of my cornerstones. I can never express the feeling of pride I have of my time here. Looking back at who I was before I started years ago now and the person I am today.

I am thankful for this opportunity to talk about my time here in this short letter, and hope that someone else can find the same experience I did.

Sincerely,

(b)(6)

Steven Clark

Antione Larry
May 2, 2016

To whom it may concern,

My name is **Antione Larry** and I attend ITT Technical Institute in Earth City, MO. I received my associate degree in (b)(6) and 3 weeks from receiving my Bachelor Degree in (b)(6). ITT has provided me with a foundation of professionalism and technology that has uplifted my efforts in finding a career that I love and see myself growing with. Attending this campus has giving me tools and the mind set to enter the workforce with confidence that I can climb the corporate ladder. Before ITT Tech, I had minimal technology knowledge. After ITT Tech, I have built several personal computers, trouble shot computer problems and now I'm working on a web page for my start up business.

Instructors at ITT have giving me an opportunity to shine. Mrs. Anderson has taught me that I have the power to make changes in my life and the world. Mr. Moss is a living example of how choices that I make daily dictate my future outcomes. Dr. Pashaie passion for engineering had me looking forward to coming to the campus and participating in the many labs that were provided. ITT curriculum was very relevant to my career and personal life. My journey with ITT, which was planned during my (b)(6) (b)(6), has been over fulfilled. The road taken wasn't easy, nothing worth it is, but at the end of this journey I feel like a brand new, educated, and proud almost graduate of ITT Technical Institute.

(b)(6)

2 May 2016

To whom it may concern:

My name is Keith Schmidt. I am in the Bachelor's (b)(6) at ITT Technical Institute at Earth City, Missouri. I completed my associate program in (b)(6) which allowed me to achieve employment at (b)(6)

In my current job I have utilized many of the skills and technical knowledge I learned at ITT. I switched to my current position at (b)(6) where I am employed as a (b)(6). I am currently looking forward to completion of my Bachelor's degree as it will better position me for a promotion, including a pay raise.

I thoroughly appreciated the Electrical Machines and Power Generation course as it directly pertained to my everyday activities and helped me to better understand what the engineers speak about on a daily basis. I also enjoyed the fiber optics class, even though I don't foresee using that in the near future.

I am proud to be a graduate of ITT. I think the ability to attend school while employed full time, the small class sizes, and the help from my instructors are instrumental to my success here.

Thank You for this opportunity to voice my opinion about ITT Tech.

Sincerely,

(b)(6)

Keith A. Schmidt

Scott Woodall

(b)(6)

5/3/2016

To Whom It May Concern:

I am a Bachelor's student at ITT Technical Institute School of (b)(6) (b)(6) at the Wilmington, MA campus. I graduated with my Associate's Degree on (b)(6). I have been working in the field since August 10th, 2015. The company I work for is (b)(6) and I am a (b)(6).

While at ITT, I learned a lot of new and exciting things. The instructors were all very knowledgeable, and would answer any questions I may have had. The time I spent during my Associate's helped prepare me for my current position. I find myself using the skills from ITT on a daily basis. The majority of the students who graduated in my school of study also decided to continue with their studies at ITT and pursue the Bachelor's Degree.

I graduated as Valedictorian of my class. In my commencement speech I stated:

"I'd like to leave you with this statement. I may be speaking up here because of my grades, but I did not work any harder than anyone else here tonight! Every graduate in this room gave it all they could to get to this point. The late nights, the early days, were tough. The work was difficult. The weather wasn't always our friend, but hey, it's New England. Balancing school, our careers, and our personal lives, is a feat worthy of praise because we are here, right now, getting a degree that proves that our hard work wasn't wasted. So applaud. Applaud your friends, your sons, daughters, brothers, sisters, husbands, wives. Let them know that you are proud to see them graduate, because that, in itself, is far greater to me than hearing one person give "thank you"s. I just realized I never introduced myself. Hello. My name is Scott Michael Woodall, and I am proud to have graduated from ITT Technical Institute. I don't just try for myself, I try for others, and I do my best to make sure that everyone gets the credit they deserve. Thank you for listening. "

I feel that the quality of the education I received from ITT was beyond my expectations. I would highly recommend any person wanting to further their careers in the technical field to attend ITT. Please feel free to contact me with any further questions regarding my experience at ITT.

Sincerely,

(b)(6)

Scott Woodall

(b)(6)

Cory Hasselmann

(b)(6)

To whom it may concern:

I have earned my Associate's Degree in (b)(6) through ITT Technical Institute, Wilmington, MA, and am currently enrolled in their Bachelors program for (b)(6)

I have recently secured a position at (b)(6). The reason I had that opportunity was because of the Career Services Department at ITT Technical Institute, who came across the opening and submitted my resume on my behalf. They have been beyond helpful in assisting my job search in my field of study. This is not the first position they have found for me or other students who attend ITT Technical Institute. I know of many individuals who would not have jobs in the Information Technology field without the assistance of the Career Services Department at ITT Technical Institute. That is just one of the great resources they have available. Their representatives are more than helpful as they go well beyond their call when assisting me. I have had two representatives at the Wilmington campus. The first one, when I first started, was named Akim. He was a great help in assisting me with transiting from the campus I attended in Arizona, ensuring all my credits transferred and my classes lined up so there was no issues in starting right back where I had left off. Akim moved on to a new position I was introduced to Eric, who became my representative as I moved on to the Bachelors program. He made sure all my classes were setup and again there were no hiccups in transitioning to the new program. They have been the most professional representatives I spoke to, out of all the colleges I spoke with. When I was searching where I wanted to attend the representatives at ITT Tech shined well above all others I spoke to and, most important, made me feel like a person, not just a number on their board. These are some of the people who have assisted me not including the Financial Aid Representatives, such as Mark and Jennifer, and also the Registrar, Owen, who had made my time here at ITT Technical Institute a wonderful experience when it came to the administrative side of things.

The lessons we are taught have helped with acquiring jobs and is not necessarily the administrative side. There has been a few teachers, who for me, have been beyond helpful in teaching me the necessary skills that will help me with the new position at (b)(6). From information technology side the two teachers that shined for me were Joe Souza and Mark Prestia. Mark and Joe taught me all the IT skills I will need to shine in my new position and move up the ladder. They taught everything from installing an operating system to creating full directories with numerous sites. However, it takes more than just reading a PowerPoint says to have a real experience with the Teacher and that is where the Teachers at ITT Tech makes the difference. The instructors work in the IT field themselves on a daily basis or did at least at one point for many years. Mike Prestia works for the (b)(6) managing their network systems and he relays a lot he learns from daily work with the current systems into his studies. So, when we cover a subject he then relates it to something he did recently in the field so that we are made aware of how it pertains to the systems currently in use. Joe Souza was also helpful whenever an issue arose that we were working on. Joe would troubleshoot the problem until you could get it working which made it much more personal than sitting in a room with a hundred other students. As for the General Education classes we attended, the Teacher that has been most influential would have to be Barbara Maddox, who taught me a lot in composition 2 and portfolio. When I was in Portfolio this is when I felt I received the most assistance since (b)(6) I have

always had a tough time with interviews and dealing with people but Barbara helped me tremendously with this issue. In Portfolio Barbara taught us how to go to interviews and setup a portfolio to show our work. This has been a huge weight off my shoulders when it comes to going to interviews and helping interviewees and customers in the field. The skills I have acquired in these classes, from these amazing Teachers, has been insurmountable in helping me acquire a position in the field and being able to handle interviews.

ITT Technical Institute Wilmington MA has been a tremendous asset in helping me transition from jobs in retail into a career in the Information Technology field. Also, I am currently in the process of completing my Bachelor's Degree in (b)(6). I would like to move into the Security side of the field which will open many more doors for me. I am proud that I attended ITT Technical Institute and look forward to graduating from here. Finally, I am looking forward to pursuing a new degree in higher learning.

Cory Hasselmann

(b)(6)

May 2, 2016

To Whom It May Concern:

My name is (b)(6) I am currently enrolled in the Bachelors of Science for (b)(6) program at IIT Technical Institute (Boston North), located in Wilmington, MA. It with great pleasure that I write to you to express how IIT-Tech has been the reason for my success at not only gaining my employment with (b)(6) where I am currently the (b)(6) but also maintaining and excelling at it.

When I first approached IIT-Tech during the fall of 2012 I was looking to change carrier paths, which with four children and nothing but a High School Equivalence Diploma, was a very daunting and nerve-racking thought to say the least. From the very beginning the staff at IIT-Tech greeted me with kindness and provided me with very detailed information about the study programs available at IIT-Tech. This provided me with a great amount of hope for my future. I enrolled immediately and after two hard years of studies, I completed the Associates program and had already been assisted in finding my first real position of employment in the industry as a Technical Team Lead with a prominent company providing remote desktop support for a vast range of clientele.

It was because of this that I continued on with my studies at IIT-Tech, knowing that I could reach higher goals, allowing me to have a career doing what I enjoy, as well as the ability to feed my family and feel accomplished. Since starting the Bachelors program at IIT-Tech, I amassed enough knowledge and confidence to move up in my career to obtain my current employment with (b)(6). Furthermore, it has provided me with the skills required to continue to excel in my profession. So much so that earlier this year TSB assigned me to its Cybersecurity Committee which is responsible for the formal creation and upkeep of the cybersecurity program for the bank. As Cybersecurity is a growing concern amongst all organizations, especially the banking industry, this is a great responsibility and a great opportunity for me. I could never have imagined being given this opportunity if it was not for everything I was taught at IIT-Tech.

In closing, not only has the curriculum at IIT-Tech been one to provide me with the knowledge I require to move forward and upward in my career but the instructors have shown me that IIT-Tech truly cares about those who are enrolled there. In my years at IIT-Tech I have grown to respect the instructors and have a deep admiration for them as well. I know that if I were ever to reach out to them, they would be happy to help me in any way they could. I truly feel that most of the instructors and staff, if not all of them, have a desire for all of us to learn and succeed, more than anything else.

Sincerely,

(b)(6)

Michael Rodriguez

To whom it may concern

I am a graduate (b)(6) from ITT Technical Institute in Wilmington, MA. I have been employed since I graduated by (b)(6) as a (b)(6)

I had a great experience as a student attending the Wilmington campus. My fellow students and instructors were helpful and knowledgeable. My time at ITT Technical Institute will stay in my memory as a positive and nourishing experience.

My capstone project consisted on a self-watering potting system which has the potential of commercialization.

The faculty made the curriculum exciting and interesting and encouraged me to expand further my education. I would be happy to be contacted as a reference by any person having further questions.

Sincerely

(b)(6)

Chris Stanton

(b)(6)

May 2, 2016

To Whom It May Concern,

I am writing to you to discuss my experience at ITT Technical Institute in Wilmington, Massachusetts.

As a student of ITT Tech I am happy to inform that the quality of education I am receiving is very acceptable for transfer into the modern work place. Thanks to the integrity of the administration, faculty and academic support systems, I am better prepared to take on the challenges set before me as a quality control inspector.

Using the academia provided by ITT for engineering graphics, I am able to understand and participate in the manufacturing industry. In my current position as (b)(6) and previous position as a (b)(6), I continually and use GD&T features and functions to create and inspect machined parts. As for the faculty, their support and encouragement has both improved and pushed me to achieve beyond goals I thought imaginable.

As a proud student, I believe the skills, knowledge and support gained during my time here will demonstrate the integrity and quality of ITT Tech's staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Jeffrey C. Zaher

Robert Bundzinski

(b)(6)

5/2/2016

To Whom It May Concern,

For the last 2 years I have been attending the Wilmington campus, for the crafting and design Associate Degree program.

For the time that I have been here all of the classes have been very informative. All of the instructors have been very helpful. The quality of the education that I have received has been very helpful with getting me a good job in the field.

For I am in my final semester and working on my final projects and looking forward to the day that I can call myself a college graduate. I will miss all of the instructor and the friends that I have made at itt. With that being said, it goes to show how much itt has made a big impact on my professional career.

I would like to personally thank itt tech for the last two years.

Warm regards,
Robert Bundzinski

(b)(6)

5/03/2016

To whom it may concern,

My name is Murat Victor Sabani, I am a graduate of ITT, at the Green Bay Wisconsin campus (019). While attending classes I got a job at (b)(6). Then after I graduated I was promoted to (b)(6).

While at ITT Tech, I was able to use the latest technology available in the field. I could not begin to say how much the staff helped me. From the instructors to the front door greeter, they made me feel like I was important. Whenever I needed help, with anything, the staff there were more than willing to help. The program of Information Systems and Cybersecurity, helped me get the promotion at work. The courses were full of knowledge, as well as the instructors. The instructors in every class, from the general education to the core classes, were so knowledgeable in their discipline. I feel like every penny spent on the education at ITT was worth it.

After graduating I enrolled in a program to obtain my Doctor of (b)(6) at Walden University, the only reason I was admitted with a bachelor's degree was due to my previous education. If it weren't for ITT I would not have had the knowledge or experience to do it. In short, my time at ITT was great, from learning to making new friends.

Sincerely,

(b)(6)

Murat Victor Sabani

To whom it may concern,

I am writing this letter to inform other people about my experience's at ITT Technical Institute.

Currently I am in my third quarter in the (b)(6) (b)(6) program.

My experience began when I meet with Wendy Holmes my career representative. Wendy explained what ITT Tech had to offer me to meet my career goals. I next was put in contact with my financial representative Jarrod. He laid out in easy to understand detail the costs of ITT Tech education and the scholarships available. After meeting with Jarrod, Wendy had me meet with Mr.Lipari the Chair of Electronics, he laid out what was expected from me and what ITT Tech offered to help me reach my goals.

In conclusion I believe the information given to me by the ITT Tech staff was helpful and accurate. I knew the curriculum would be tough. I have not been disappointed. I am grateful that the program is so intensive, so that when I finish, I am confident I will be prepared to enter and excel in the working world.

Sincerely

Campus: 020, Troy Mi

Employment Status: Employed

Employer: (b)(6)

Job Title: (b)(6)

To whom it may concern:

I attended ITT Technical Institute in Troy, Michigan since June of 2013. My experience at ITT Tech was very positive due to all of the friendly staff and instructors. Everyone was willing to assist me with anything that I needed from assistance in the classroom, LRC, Tech-lab, to just being friendly and asking about my day. I graduated with my Associates Degree in (b)(6)

(b)(6) In the entire time that I have attended ITT Tech, in Troy, Michigan, all of the staff and instructors in finding my classrooms, LRC, and the offices in the front (including finance, teachers area, the chairs, Dean, Director, and the registrar). My time at ITT Tech in Troy, Michigan, has been great and I have and will continue to recommend my friends and family to attend ITT Tech if they are looking to advance their education.

I was able to start the Student Veterans of America chapter at ITT Tech Troy, MI with the assistance of the staff and the Associate Dean of General Studies. They care about veterans and they work with veterans in order to ensure that they are able to have their classes paid for through the Veterans Administration. The finance department does this so that the veterans do not have to stress on finances and can focus on their classes. Also for an entire week around Veterans Day in November, the school and the SVA now, work together to set up a veteran's week. This shows the veterans that the school does care about veterans, if they attend the school or not. In closing, I would recommend ITT Tech, Troy, Michigan, to anyone looking to advance their education.

ACICS Letter Campaign

Student: Horowitz, Elisha (b)(6)

Campus: 020, Troy MI

Employment Status: Not employed

Ever since I was young, electronics have always been either something I enjoyed researching and discovering new things about or the only thing I would take on and fix when a computer wasn't working or the controller at home. I decided to come to ITT Tech because I've always had a passion for electronic and I know I always will and a technological school sounded like the best chance to find a career I could enjoy for the rest of my life.

When I first came to ITT I didn't know what major I would want to follow, there were so many choices and I couldn't choice it on my own. My student representative helped me narrow down my choices for a major I could study at ITT tech. she was extremely helpful with everything that I needed to enroll myself in this year's classes and still to this day even though I no longer need to see her for any help she still will give me a phone call ever couple of months to make sure everything is going well and I appreciate her honor to her students.

When I started school everyone was extremely welcoming and helpful and they still all are to this day. If there is every anything that you noticed about the school that could be approved you always have the opportunity to be heard by the higher ups in the school, by allowing the students to give opinions and suggestions every quarter about what could be improved.

In a school administration, I've never met such amazing and helpful people but, I do believe here at ITT tech they have the best staff. At ITT tech, nothing is sugar coated the teachers will tell you if you will struggle in a class or not but even when they tell you that you will need to put in extra time they also put in extra time to help you comprehend and digest everything in your labs, discussions, and exercises. In the engineering

program, there is a hands-on certification test that you can have the opportunity to take to help you advance as quick as possible in your career. This includes a lot of time out of class to acquire but the teachers never deny you the opportunity to partake in the hands on even if you can't come to the school on Saturdays, there will always be a teacher available to help you and test you before your classes start while you're in school. All it takes is a little time, help, patience and encouragement to go all the way with your degree at ITT tech and I will never have to say, "I wish I never enrolled at ITT Tech," because I cannot imagine not being where I am today without them.

Job Title: (b)(6)

May 1, 2016

To Whom It May Concern:

I am writing to let you know how very pleased I am with my experience and education that I am receiving at ITT Technical Institute in Troy, Michigan.

When I started to attend ITT Technical Institute, I was working at least fifty hours a week. As many people are aware, working and attending school can be challenging. However, the flexibility with night classes that ITT Technical Institute has had to offer, allowed me to continue working while attending school. Not only has the flexibility been extremely helpful in my circumstance, but also the classroom setting. Being a student, I am grateful that I have not had to purchase a physical textbook that I have had to carry from class to class. The availability of the electronic textbooks has been very convenient. It is always available to me whether in the classroom or at home. Also, having small class sizes allows my professor to know me by name and not just a student number. The small class size gives me the opportunity to work with all of my colleagues allowing me to enhance my skills of communication, leadership and teamwork.

ITT Technical Institute has been very helpful, especially the career service center. As a student, I wanted to try and start my career path as early as possible. The career service center has given me this opportunity by assisting me in finding employment. Without the help of the career center, I would not have my current position at (b)(6). I am now pleased to say that I am doing what I enjoy, and I can utilize the education that I receive from school at work.

ITT Technical Institute has changed my life in a positive way. I was encouraged to obtain a degree, but it would not have been possible if I did not have the flexibility or the small classroom environment. I have become academically motivated, where once I obtain my associates in (b)(6), then I will further my education with my bachelors in (b)(6). ITT Technical Institute took a chance on me, and this is an experience I will always be thankful for.

Sincerely,

(b)(6)

Employer: (b)(6)

Job Title: (b)(6)

I have been a student at ITT for a couple years now. I completed my associate's degree in the (b)(6) program and now I am continuing my education in the bachelors program. My experience here has been a great one and has done a lot to help me grow and become the young adult I am today.

The teaching staff is one of my favorites amongst the couple other colleges I have been to. I am able to know my teachers one on one. They always ask how I am doing and show interest in how my life is going outside of school. I know all of them by name and to me, I can tell they are all working hard to get us the best education they can get us.

I learned about ITT from my father, he mentioned what they have to offer and that going here would not be a waste of my time. That's where I met one of the best recruiters I have ever met. He is a great guy and again, always checks up on me and asks how I am doing, how my family is doing.

ITT has almost become a home away from home. Sometimes I'll show up to classes extra early to get some extra things done. The students that are there are equally interested in what we have to learn. I have made some good friends here at ITT and this will hopefully lead to lifelong relationships.

Overall ITT has been one of the better choices in my life and I know with the hands on training and experiences I am obtaining, this will help me to find a home in the career path I have chosen. Again this has a lot to do with the faculty and teachers that ITT has. I thank all my teachers that I have had there at the Troy location for I would not be where I am today without them.

(b)(6)

To whom it may concern:

I am writing to express my appreciation of (b)(6) / ITT Tech. I am nearing the end of my second quarter and so far am very pleased with the program. The instructors here are wonderful and always willing to help with areas of struggle. I previously attended a larger school and took classes part-time but didn't get anywhere. After deciding to take a semester off, two years passed by before I knew it and I was still in the same place. I finally decided that I need to get serious and started looking into different programs around the central Ohio area. I was referred to come check out Breckinridge by a coworker who attends school here as well. After touring the facility and going over all the details I was happily accepted into the (b)(6) program the same day!

I am beyond pleased with the program since I've started. The location is convenient and the small class sizes are great! As a busy adult working full time and having a family Breckinridge has been a breath of fresh air and I am very confident that I will finish my program as scheduled and begin my (b)(6) career with all the tools I need to succeed!

Justine Harvey

(b)(6)

May 3, 2016

To whom it may concern,

ITT-Tech Hilliard is the right match for me. I looked at just about every associate degree (b)(6) program in Central Ohio and felt that ITT-Tech had the best to offer. The facility is up to date and clean. The nursing labs have supplies and equipment that rival most schools with (b)(6) programs. The instructors are very knowledgeable about the text and real world applications. They are always approachable and offer plenty of chances for tutoring and additional help. I love that the class sizes are small which help with learning and also accountability. Being in my second quarter I do feel that ITT-Tech was the best choice for me to complete my (b)(6) degree.

(b)(6)

Roxanne Sutton

May 3, 2016

To Whom It May Concern,

Ever since I started my journey at ITT Technical Institute I have noticed changes in myself and in the way people treat me. I was of course nervous about starting a new chapter in my life, however now that I have I am very grateful for it. Taking courses through ITT has helped me keep my goals in sight of becoming a (b)(6) and the instructors are fantastic. They are always there to help and eager to teach, which is more appreciated than they realize. Attending ITT has increased my self-confidence and I cannot wait until my graduation day when I can look back and say, I made it. I can only hope that when I continue my education towards a Bachelor's degree, I will be blessed enough to have a school as attentive and caring as this one with wonderful instructors to match.

To Whom it may Concern,

My experience here at ITT Technical Institute has been great all the instructor's I have had or still have are very helpful and will even help you when you're taking an online course and you're not sure on how to answer or if you just don't understand what's going on. They will help you one on one. Also, the staff in the building is very helpful, recommending students to come back for their bachelor's.

The quality that I have received my education was good even though family emergencies come up or you have to drop a quarter like I did. I was welcome to come back by the (b)(6) with my GPA being high and all my grades were passing.

Coming here has impacted my life by making better life choices for myself and (b)(6) By getting my associates and on my way getting my bachelor's degree will set a better job for me in the long run.

Thanks,

Heather Brown

(b)(6)

To whom it may concern,

Throughout my time at ITT Technical Institute, the experience has been amazing. The ability to grow in my field of study, and the ability to network with professionals in my line of study, as well as making friends I know I will have for a lifetime could not be any better. The instructor like Mr. Tom Davison, Professor Nagi Matta, as well as our Dean, Mr. Alex Chestnut, have always been there to make sure we are getting the most out of our time on campus, and the online classes. The classes I have taken here at the Hilliard campus have opened my life to a whole new world of possibilities. Without the education I have earned here at ITT Tech, I personally would not be able to compete in the Business world. Nor would I be able to gain the life experiences the instructors here share. Thanks to the education I have gained From ITT Tech., I know I will be able to provide a much better way of life for my family.

Sincerely,

(b)(6)

Dennis A. Bega

David J Lowry

(b)(6)

To whom it may concern,

I first enrolled at ITT in (b)(6). I had a great career prior to enrolling at ITT, but I was not satisfied. I decided to further my education and ITT had the precise school of study that I was looking for. I excelled at this institution. I graduated from ITT in Hilliard Ohio in 2012 with the degree of Associate of (b)(6). I finished my program with highest honors and was inducted into the National Technical Honor Society. I also received the honor of being the student speaker at the commencement ceremony.

I was able to secure a job interview within a week of graduation and started my new career two weeks later. I still work at the same engineering firm and have been able to grow in my position. As of September of 2015, I decided to enroll at ITT to further my education and pursue a Bachelor's Degree in (b)(6).

I have been able to excel thus far in the program with the support of the instructors and staff at ITT. I continue to strive for the Dean's list every quarter by maintaining highest honors and perfect attendance. I look forward to building on the career that I have with this new degree. Since my enrollment, I have been given more opportunities in my current role and I anticipate more growth within the company.

Much of my success thus far has been a direct result of the education I received from ITT. I am eternally grateful for all the opportunities I have had and look forward to more in the future.

Sincerely,

(b)(6)

David J Lowry

Student

To whom it may Concern

ITT Technical institute has had a positive impact on my studies as a student. There are some areas that need improvement but overall I am more than satisfied with the opportunity ITT Technical Institute has given me. The things I am most proud of ITT is their financial aid department, learning center library, and faculty members have all been outstanding in my opinion. I would also like to inform you that the tutors have been very helpful and very useful. As a senior student I can proudly announce to you that the senior capstone projects are very similar to what you would experience in the real world. In other words ITT Tech prepares all its students what to expect in the real world by providing valuable experience. I would definitely recommend ITT Technical Institute to any future student.

Sincerely Yours

(b)(6)

Lake Mary, FL 32746

Dear Sirs:

When I signed up for ITT Technical Institute the process was smooth. I received a free laptop which was a great benefit to help me with my homework. This location is home to my home which makes it easy to get to my classes. At the time it was also close to my job, I am at a different job now. I am able to further my education at this school. I like small classroom size and labs. In conclusion, I would recommended my friends to sign up to go to ITT Technical Institute.

Sincerely,

Jamari Penn

To whom it may concern,

My experience at ITT has been for the most part pleasant and without incident. The staff is very knowledgeable and very professional. The campus is always clean and comfortable. The entrance process was smooth and the staff was always willing help. This is the first time I have used e books and it took some getting accustomed to but it's ok so far. Hopefully in time I will master it. The librarian has been very helpful and the availability computers have been excellent.

Sincerely

Stephen Benjamin

To Whom It May Concern:

My name is Michael Nowlin and I would like to take this opportunity to describe my experience here at the Lake Mary Campus for ITT Technical Institute.

In the summer of 2015 I made a choice to attend a campus of ITT instead of online course as it gives myself a better learning environment by working with the instructors along with other students. Yvette Rodgers, a representative of ITT, worked with me in selecting a degree that would both suit my skillset and would enjoy which was the (b)(6) degree. I am currently approaching the end of my third quarter and am proud of my standing 4.0 GPA which is something that I cannot take all the credit for. The instructors at ITT have helped me reach beyond what I knew was possible and it has been both challenging and exciting. The opportunities here have been proven to be endless as long as the effort is applied.

Going into my second quarter I have had the honor of becoming an employee of (b)(6) (b)(6). I have also had the opportunity of being a guest speaker at the New Student Orientation in March, 2016. I am looking forward to what the future holds for me after graduation; however, my hope is that I may inspire other students with what is possible during my time here at the Lake Mary Campus of ITT Technical Institute.

Sincerely,

(b)(6)

Michael Nowlin

ITT Technical Institute:

In my experience every aspect of being at ITT Technical Institute has been positive, from the initial interview to class experience has been good, all of the professors are willing to help out at any time with any issue, and every aspect of learning has been positive whenever I have an issue regardless of the class one of the professors will answer it or find the answer and explain it in a matter that I understand. Classrooms are well organized and well maintained, there are enough computer systems in the computer labs that I have rarely had the need to use my own computer at school for me the decision to go to ITT has been a good one it fits my schedule nicely and when my schedule changes the school has been very accommodating. The students in my classes are very easy to work with and we get along well with each other in and out of school. As a class we get along well and work together to solve most issues as a group, it seems easier to be wrong as a group than as an individual and with the professors help this is a rare occurrence because of this I feel that the learning experience is greatly improved between the classroom and school.

Willie Robertson

(b)(6)

To Whom it may concern

Some time at the end of November, I was enquiring via internet about attending college in the technical field. I woke up the next morning to play golf and received a phone call from a very nice lady named Ana Coker on the golf course. She was very persuasive to get me off the golf course and in to see her. I was so excited; I chose to start class within two weeks of meeting Mrs. Coker. When I started class there was scheduling and a professor conflict that was rectified painlessly and without issue. The professors are very understanding about us being busy adults. The positive recognition received for attendance and highest honors is a great addition from the leadership of this institutc. I am still very new in my journey to achieve my first degree and with the help from ITT I should reach my goals.

Sincerely

Willie Robertson

When planning or changing a future, a person must find the proper situation to which they can grow and learn. For me, ITT was the best option and looked like it would be the institute that I could learn from and be successful. From working with the recruiter to getting into a class room, the staff has worked to give me the chance to accomplish that goal. While some professors are more involved than others, all seem to at least try to help students be successful. I still have a year left on my Associates Degree, but I have already worked with career services and found work related to the technical world. My journey is not yet complete, but so far it has been a rough road of re-learning skills I have not used in a while, as well as, new skills that I have taken from each aspect of my time in ITT Technical Institute.

Thank you,
William Kelly

(b)(6)

5/07/2016

To Whom It May Concern,

I am writing to you to discuss my experience in attending the ITT Technical Institute in Lake Mary Florida.

As a student of ITT Technical Institute, I am proud of the quality of the education I am receiving. Thanks to the integrity of the admiration, faculty and academic support system at ITT Tech, I am better prepared to take on the challenges of the Drafting and Design field as a productive and career-oriented Student.

ITT Tech has provided me the necessary skills and motivation need in order to find and filter jobs that best suite my skillset. The program is geared for individuals that are motivated and want to find the right solutions for the task at hand. The faculty has been very helpful throughout my education here on campus and whenever I have a question I am always guided in the proper direction.

Through their career service, I have been granted many opportunities to gain working experience. I have completed 2 job interviews and one landed me a freelance position working on furniture brochure with (b)(6) As a proud Student of ITT Technical Institute, I believe the knowledge and skills that I am gaining during my education helps demonstrate the integrity and quality of their staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

(b)(6)

Robert Westby

May 4, 2016

To whom it may concern:

My name is Rocco J. Combine RN and I am a member of the first graduating class from the (b)(6) (b)(6) at ITT Technical Institute, Youngstown campus. The educational experience that I had at my campus was phenomenal. As a member of the first class to graduate and the first to take the (b)(6) Licensing exam I felt very well prepared and passed on the first try in 75 questions three weeks after official graduation. Not only was I well prepared clinically but they helped me with the necessary tools that enabled me to interview and be hired at a (b)(6) one week after passing my (b)(6) and was then employed as a (b)(6) who floated between seven different (b)(6) within my hospital system. Not long after I began working for (b)(6) as a (b)(6) (b)(6). Within less than 9 months of being in that position I was promoted based on my performance and experience to (b)(6) for the (b)(6) (b)(6) and now oversee education for all of the (b)(6) and a myriad of other medical professionals for the (b)(6).

It is my belief that the experiences I was afforded at my campus helped prepare clinically to walk into an (b)(6) setting right out of (b)(6) school, to then walk into management level positions and I now impart and utilize that same experience that the instructors and the former (b)(6) (b)(6) helped to foster in me to be as successful as I have been since graduating in (b)(6).

Please consider well the reaccreditation of this school and look at the successes that I have had as graduate of their program at the Youngstown campus. All of the staff there were and continue to be amazing people and they promote excellence.

Thank you for your time.

Best,

(b)(6)

Rocco J. Combine (b)(6)

To Whom It May Concern:

I am writing to discuss my experience in attending the Youngstown, OH ITT Technical Institute.

As a graduate of ITT Technical Institute, not once but twice, I'm very proud of the education I received. I received my Associate Degree in Multi-Media and then went back for my Bachelor Degree in IT. Thanks to the integrity of the entire staff, I was prepared to take on the Field Operations Engineer position at

(b)(6)

ITT Tech provided me with a combination of lab and theory courses which gave me the skill sets that I needed to become a leader in the IT field. Career Services maintained in constant touch with me throughout my education to help me with the career path I wanted to go down. They helped me in gaining experience while I finished my degree and assisted after graduation to help me move up in the IT world. Without the help from the staff at ITT Tech I wouldn't be where I am today. I always recommend ITT Tech to my friends.

As a proud graduate of ITT Technical Institute, I believe the skills and education I have received have been valuable in attaining my career goals. Without ITT Technical Institute I would not be where I am today. I am thankful for this every day.

Sincerely,

(b)(6)

Frank Varner

Michael R. Miller Jr.

(b)(6)

May 3rd, 2016

To Whom It May Concern:

I graduated from the ITT Technical Institute's Youngstown OH campus in 2015. I finished the Associate's Degree of (b)(6) and would like to comment on my positive experience. The coursework was tailored for success, the instructors were thorough, and the career counselors assisted me in obtaining my career goals.

I entered the program with no prior knowledge of drafting and design, and was unsure as to what discipline I wanted to focus on. The (b)(6) provided me with several courses in each area: architectural, civil, and mechanical. I feel the coursework was scaled appropriately that increased in both difficulty and competency requirements. These courses sparked my desire to pursue architectural design.

The instructors were actively working within the field, and applied real world scenarios in their coursework. They went above and beyond to assist in learning the given coursework, and took time to discuss advanced topics. It was through this experience that I gained the confidence and skills necessary to become a successful draftsman.

The career counselors played a significant role in helping me obtain my goals of becoming a career draftsman by providing instruction in resume building, job searching, and interview strategies. Specifically, it was the career counselors who assisted me in obtaining an internship with (b)(6) during the summer of 2014. That internship transitioned into a full time position where I am now a (b)(6).

My experience at the ITT Technical Institute's Youngstown OH campus has been life changing. I am proud to be a graduate, and would recommend this school to prospective students. Thank you for your time.

Sincerely,

(b)(6)

Michael R. Miller Jr.

Lovell Walls

(b)(6)

To whom it may concern:

I am a graduate of ITT- Technical Institute of the Youngstown, Ohio branch. I started at ITT at the age of  I lost my job and went back to school.

How special my experience was at the school. I knew very little about computers and networking when I started school, but by the time I graduated with my first degree, I actually knew how to work and network computers. I tell people all the time, if you put the time into your schooling, and listen to what the instructors are teaching you can learn anything. The Instructors are great, and very knowledgeable and are willing to help any student.

If I can go back to school late in life, and succeed, then anyone can if they put their heart into it.

Thank you,

(b)(6)

Benjamin Rush – ITT May 4th, 2016

Just under (b)(6) I started attending ITT at the Youngstown Ohio campus from right out of high school. I had been doing some coding on my own for the previous three years, two of which were in addition to a course at my high school which really supplemented my experience. Since I came into ITT with a decently sized knowledge base for programming I knew there was going to be at least a little bit of overlap, but there was not too much of it. After the first Introduction to Programming class, we started right into HTML, CSS, and VB to get a foothold on software development in general, advancing into Javascript, Java, and C# not too long after. The technology used was fairly up to date with current marketplace trends so I was able to use ITT as a basis for what I would expand into on my free time. For example, when using Javascript and JQuery for web design I pushed it even further by using mobile phone sensory data in order to create an interactive game with the canvas element.

Almost the entire faculty, and especially most of the teachers, have been absolutely amazing. They have been willing to go above the curriculum when they acknowledge that is what I would like to do, and help work alongside you in order to figure out solutions for your code. I would have liked it if there was a more competitive nature between the students in order to give them the drive and motivation needed to accompany me in going beyond the curriculum, but with any education it is very heavily based on how much effort the student puts in. I am headed to graduate next month (June 2016) with perfect attendance and a 4.0 because I have wanted to squeeze as much use out of this experience as possible. I am proud to be graduating with a job in my field that career services has found for me. I work at (b)(6) as a (b)(6) and it has been going fantastically so far. I hope to continue on with my education, training, and career for as long as I can learn.

(b)(6)

Natalie Westfall

(b)(6)

(b)(6)

May 3, 2016

To Whom It May Concern,

I am writing this letter in regards to my positive experience at ITT Technical Institute located at 1030 Meridian Road, Youngstown, Ohio 44509. I am in my (b)(6) and I am honored to be able to attend a school that truly has their students' best interest at heart. There is always a "Good Morning" or "How are you today?" as you enter the building. The faculty will do whatever is within their power to help any student with their academic needs as well as being there just to listen and offer encouragement when the pressures of life are hard to handle. I have enjoyed coming to class every day and am excited to continue my education in the field I have loved since I was a child. I work as a private hire home health aide now and after graduation am looking into becoming a hospice nurse. The classes offered here, though at times are difficult, are beneficial as they are taught in a fashion for which we can grasp and comprehend the lessons which will be a necessity in our daily work environment. I would recommend this school to anyone who is thinking about a career in nursing. Thank you for taking the time to read this letter and have a wonderful day.

Warm regards,

(b)(6)

Natalie Westfall,

(b)(6)

Student at ITT Technical Institute

Junior Moreno

(b)(6)

May 3, 2016

To whom it may concern,

I attended the Houston North campus of ITT Technical Institute beginning in 2010 and graduated in 2012. I had a very positive experience and the skills that I learned at ITT Technical Institute have allowed me to find success in the IT industry with numerous companies within a relatively short period of time.

While at ITT Technical Institute, I acquired the following knowledge, skills, and experience of some of the biggest names and technologies in the IT industry such as Windows Server 2008 R2 management, Active Directory, Cisco routing and switching, Linux administration, and desktop operating systems. All of these skills have been crucial to my success upon graduation. I have, at one point or another, used all of these skills within the various positions I have held within the IT field.

Before attending ITT Technical Institute, I worked one meaningless job after another and never enjoyed any of the menial tasks I was assigned. The decision to return to school to pursue a career was the best decision of my life. That decision led to the invaluable education and experience I received at ITT Technical Institute. Indeed, had it not been for the skills that I learned, I would not have my current position as a (b)(6)

If you would like to discuss this in greater detail, please feel free to reach out to me via email or phone.

Warm regards,

(b)(6)

Junior Moreno

5/2/16

To Whom It May Concern:

I am writing this letter to describe my experience at the ITT campus in Seattle, WA.

I am a current student in my final quarter of my Associates program for (b)(6)
(b)(6) My overall experience here has been very good. I have had some excellent instructors that continue to help me out or answer questions as I am going through this program. I commend Mr. Olsen, Ms. Wethered, Mr. Evans, and Mr. Turylo. They are all exceptional instructors and I have always been able to go back to them at any time for assistance with classes even if they are not my current instructors. I feel that I have learned a great deal during my time here.

I have had a good experience with all of the staff here, such as Career Services, the LRC, Financial Aid, Recruiters, and the Registrar.

I am very pleased to be graduating in July with the knowledge I have gained and look forward to continuing on with my (b)(6) degree.

Thank you for your time.

(b)(6)

Judy Evans

May 2, 2016

To whom it may concern:

I am writing to you to discuss my experience in attending the ITT Technical Institute in Seattle, WA.

As a student going into my Bachelor's in (b)(6) I would say that I am Proud in the quality of the education that I have received and will be receiving. Thanks to integrity of the administration, faculty and academic support systems at ITT Tech, I am better Prepared to take on the challenges of being an Employee at (b)(6)

This school has helped me with understanding how Electrons work and also with how they communicate with each other. And without the attention from my teachers, career counselors and scholarship support, I would not be with (b)(6) Today.

As a Proud Student and graduate of ITT Technical Institute, I believe the knowledge and skills that I have and will learn will help demonstrate the quality of the staff, faculty and academic programs.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Kelly Dechert

(b)(6)

To Whom It May Concern:

May 3, 2016

I started my career at ITT Technical Institute with very little college experience and only a high school diploma. It was because of the class sizes that I was able to succeed where I have failed in the past in college. It was also because of the hands-on experience that I was able to achieve my goal of graduating with my Associate of (b)(6) I was working as a (b)(6) but am currently looking for a more stable and permanent career in the Information Technology industry.

The staff at ITT Technical Institute works hard to make sure that all the students attending ITT Technical Institute, who want to succeed, do succeed. They do this by offering help, when needed, this includes remedial help with every subject that is offered at ITT Technical Institute. The instructors in the classroom coach you through every lab and give you advice on how to research and solve problems.

I firmly believe that the principles that are taught at ITT Technical Institute have prepared me for a career in the Information Technology industry. The staff cares about your success, because when you succeed, they also succeed. This is what draws people to ITT Technical Institute, the drive to succeed, the students know that upon graduation their future is bright. I believe what ITT Technical Institute does is a pathway to success, so I have enrolled in the Bachelor of (b)(6) program.

Yours Truly,

(b)(6)

Todd William Rose

(b)(6)

Victoria Norwood

(b)(6)

May 4, 2016

To Whom to May Concern:

My name is Victoria Norwood. I am both a student and a grad of ITT Technical Institute. I have received my associate's in (b)(6) through ITT Tech, and I have just started my bachelor's in (b)(6). For both my associate's and bachelor's degree, I have and will continue to receive my education at the Seattle campus.

Through the wonderful effort of my career advisor at ITT Tech and my go get them attitude, I was able to obtain a job within (b)(6). I work for their IT department in their one to one program. This is a program were students receive a laptop at the start of the school year. Each school has at least one if not two tech experts, that will help teachers and students with any technology related issue. ITT Tech, my fearless attitude and my love of technology has set me on the career path of my dreams.

I have loved my time here at ITT Tech. From the teachers that are helpful and very friendly, to the Dean that has an open door policy for her students. The day I signed up with ITT Tech I had fun. I met a teacher that would soon be my teacher, and one of my favorite teachers. He talked to me about my dreams of creating video games, as well as helped me get over my fear of going back to school. I am dyslexic and school has always been a scary place for me. With ITT Tech, I found that I had no need to be scared. With free tutoring and teachers willing to help you when you need it, school became fun.

Class sizes were small, but it also gave way for more interaction between student and teacher. Each of my teachers knew their students by heart. They knew how the students worked together, and how to interact with them. I loved how teachers came down to your level. How they will work with you to make learning fun, and not something that felt like a chore. I could say without a doubt that I have had some wonderful teachers during my time here.

My favorite class was capstone. This is the final class before graduation. This is where you take everything you have learned and put it to use. Let your creative juices flag fly! This is your time to shine. You can work together with other students or you can work alone. This choice was yours to make. Most students start long before the class comes about to figure out and think up what they would like to do for their finale project. Hey I did. I created a game. When the end of this class came around you were able to show off your hard work. It's the best feeling in the world.

If you ask me do I recommend ITT Tech to other students? I would yes. It has been a memory and continues to be a memory I will hold dear for the rest of my life. I gained so much by going to ITT Tech. I do not regret the decision i made when I signed my enrollment papers. I believe you would not regret it either.

Sincerely,

(b)(6)

Victoria Norwood

To Whom It May Concern

May 2nd, 2016

I began my cyber educational journey into the realm of (b)(6) at ITT Technical College located in Seattle, Washington in the year 2012. I graduated in the year (b)(6). During my quest for higher education I worked full-time for (b)(6). My job position was as a (b)(6) main distribution warehouse.

ITT is one of those schools that inspires and encourages students to use their knowledge responsibly for positive and productive means within our society. There are classes which are required to earn an Applied Science degree, these classes are of a social science nature and also of administrative nature. The class curriculum is designed to teach students to be leaders in their fields. The reason I say this is because my position as a (b)(6) changed to (b)(6).

I designed a new inventory tracking data base the result of this action was a promotion to (b)(6) that job ended in 2014 after I had a motorcycle accident. During my time as an (b)(6) I developed a system that located thousands of dollars of (b)(6) products that were assumed lost or stolen. My next employment was in 2014 working for (b)(6) performing duties which required employees to work without supervision and travel to specific US Banks within the state of Washington and to other states to work on sight removing and installing new physical data equipment which included configuring the new equipment to the current operating systems as required.

I currently work as a (b)(6) I am working on acquiring my license, and have found work that I can do performing cyber investigations. Most recently, I have been

granted the opportunity to put together a cyber drone workshop for my fellow students and am very excited to be working as a volunteer within the halls of ITT. My reasoning for the workshop is to give other student who are working on earning their Associates degrees the opportunity to gain more hands on experience before they graduate.

The reason I enrolled at ITT Tech., was because I believed that this is a school of higher education that feeds the minds of those who have a desire to be on the cutting edge of technology. I had a desire to help defend against cyber criminals who move undetected through cyberspace. My intention was to only earn an Associates' degree and with that advance my financial status with a career.

Why I'm now enrolled at ITT, working on earning my Bachelors of (b)(6) Degree is because everything that I was looking for in this school has been delivered by the teachers, professors and other staff that work within the walls of ITT. This school has helped me grow into a leader in my chosen field, and inspires me constantly to be a better person. Almost everything I have learned over the years spent at ITT has come into play in life beyond book learning and theory. The practical applications of what I have learned moves to want more from a school that has more than proven its educational worth in my life.

Sincerely

(b)(6)

/ James L. McFadden

To whom it may concern:

I am a current student at ITT Technical Institute in Eden Prairie, MN. I am in the (b)(6) program and set to graduate with my associates the beginning of (b)(6). It is hard to believe that two years has gone by already. My experience here at ITT has been an interesting two years learning my program. The teachers have all been wonderful and knowledgeable with the course they teach. I am currently looking to further my education and obtain my bachelor's degree in (b)(6) as well. I look forward to continuing my education with the staff here at ITT Technical Institute.

Sincerely,

(b)(6)

To whom it may concern;

I started my degree in (b)(6) and I am very pleased at what I have taken in thus far. I have been able to utilize many different programs that works solely with electrical design and implementation, along with tracking currents and their calculations. I have learned to program PLCs', read wiring diagrams, read and create ladder logic diagrams, create power points, and so much more. The instructors and faculty has been very patient with me, as well as helpful to get me through my classes, and succeed as a student.

Thank you for your time.

My experience at the Eden Prairie campus of ITT Technical Institute has been a very pleasant one. Since the beginning, almost one and half years ago, I have learned a great deal in the field of electronics. Upon entering my studies I expected to get a lot of hands on time in the labs and very much look forward to this, ITT delivered. The instructors that work in the field and teach here are knowledgeable and enjoy conveying their experience with the students. I feel that this school is well preparing me for the workforce and it was a good choice to enroll at this campus.

To Whom It May Concern,

Back in August of 2014 I contacted ITT-Tech about pursuing my education. Very shortly after, I was contacted by a gentleman who has been an active part in my continuing involvement of that education, his name is Don Baker. Don and I met shortly after that. Don was instrumental in my choosing to go to ITT-Tech. We got along right away and I felt quite comfortable with him.

The information I receive in school I would consider relevant to my future that I wish to pursue. I am an older student (b)(6) and unlike some of my fellow class mates, I have thoroughly enjoyed each and every one of my instructors. It is enjoyable for me to come to class. I would like to talk a little bit more about my instructors. I have always felt like the instructors in the NSA (Network System Administration) actually cared and enjoyed teaching. They have all been fair. The only thing I ever felt that would hold someone back from attaining the grades they wanted would be by their own volition.

I currently go to ITT-Tech in Eden Prairie, MN. I live almost 70 miles away from school, and even though I do get tired some days of the drive, I would not choose to attend any other school. This is due to the fact of not only the faculty but the administration of the school also. Everyone here actually cares and is nice. They do everything to help you succeed.

I am currently in my (b)(6) degree and am looking forward to continuing my education here in the bachelors program of ITT-Tech.

Thank you,

Christian Gleason – Student at ITT Technical Institute – Eden Prairie, Minnesota

To whom it may concern:

My experience with the recruitment process and the recruiter was a very positive experience, all of my questions and concerns were answered quickly and professionally. I chose in I.T.T. tech in Eden Prairie because I felt that there courses were very straight forward and very relevant to my career goals, the instructors were very knowledgeable and patient, as I had not been in school for almost 17 years and in my late forties they were great to work with. I am currently employed at (b)(6) and have been an employee there for 18 years and my job Tittle is

(b)(6)

To whom it my concern:

I guess my experience here at ITT started with a conversation with my fiancé. I was working as a security manager and yet I was extremely un happy. I have always had a passion for IT and home networking, so we talked about me going back to school. I had always seen the commercials for ITT and I knew that a degree from ITT should defiantly give me the tools to build on my current skills. The Eden Prairie campus was an easy choice because I am living in Eagan. When I came I actually was very skeptical but I liked that this school could use my previous school and degree in Audio could be used towards my new degrees. Don Bakker was my recruiter before he took his new job as director of Career services, and was able to show me that with the amount of credits that could transfer and how close the Electrical engineering degree and the networking systems administration would create much more potential for a career in networking.

I am currently working towards my (b)(6) associate degree. I am planning on graduating in (b)(6) and then I plan on re enrolling in the (b)(6) associate degree because I will only have 10 classes to take and then I will finish both degrees. I plan on getting certificates for Cisco and Microsoft through The Center for Professional Development.

I am currently working for (b)(6) but I have talked with my managers and the current plan is to get me into IT for them in the future. And I am excited because if it is not with them it will be with someone else who can use my skills that I have learned from ITT.

Sincerely,

(b)(6)

5/5/16

To whom it may concern,

Overall my experience at ITT-Technical Institute in Eden Prairie has been good. It is nice that all of the classes here are night classes that allow me to have a full-time job and go to school at the same time, although it can be a handful at times. What I have noticed is that most of my classes are geared toward certifications, and preparing students for the work place, which is a great thing. All of my instructors have been very helpful and very willing to help with any questions or problems that I have.

5/2/2016

Dear ITT Students and Faculty,

I personally want to thank ITT Tech for helping me realize my potential and giving me the necessary tools I needed to make it in this technology driven world. ITT gave me the training and hands on experience I needed to acquire an entry level position in the IT industry.

I am so grateful for the time and effort of all of my instructors and the Career Services Department put in to turning me into the tech I am today. My journey is probably like any of you that are now enrolled in ITT. (b)(6)

(b)(6)

(b)(6)

I bounced around a lot just trying to find my niche. I never could quite find and get comfortable in a job. Quite frankly without an education, whether it be Technical or College it is very tough to succeed in the corporate world these days.

I saw a commercial on TV for ITT Tech in 2010 (just like many of you) so I went online to see what they offered. After doing my research I realized that in this technology age I would be a fool not to pursue a career in the Technology Industry. I made an appointment with a representative to check things out and found the perfect major for me, (b)(6)

(b)(6) What made me choose ITT wasn't just about what they offered it was more about what they showed me about themselves. They showed me that they really cared about what I wanted and they would do anything they could to help me succeed. They didn't push and lie to me about the school just to get me in. They showed me the door and gave me the confidence to walk through it.

If you want to succeed like I did then you will have to go to your classes every day that you have them. There is something that I live by and will help you in life. If you're early you're on time, if you're on time you're late, and if you're late you're fired. The same goes for school and work. Punctuality shows your employers and your instructors that you have respect for them and

yourself, and that you want to be there. During my time at ITT it wasn't always easy, I had to work through (b)(6). No matter what I faced I kept thinking of my end game and where I could be if I worked (b)(6).

One of the best things that will help any new student whether you are a working adult or fresh out of high school get through school is the study hall before class and the fact that you can stay after class to do your homework. I took advantage of that every day. Since I worked my butt off every day and stayed after class for homework and help and was always one of the first students in the building. I studied every night, I ended up graduating second in my class and made Distinguished Honors every semester and became a member of the National Technical Honor Society.

I took full advantage of the Career Services. The people of CS work extremely hard to get the leads you need to succeed. Because I worked so hard to do well in school, I was offered a position while I was still in school as a Tier 1 Help desk support. Doing well in school is great and all but you have to work to retain that knowledge to succeed in the future. If you think you can do well, get a career and then just put yourself on auto pilot you are sadly mistaken. This industry is forever changing, if you want to succeed you have to adapt and change with it. I did everything my employer has ever asked me to do and I aggressively asked to learn new things and after 2 years I was promoted and I accepted a position as a (b)(6) for one of our customers in Texas. I was able to be this successful because ITT pointed me in the right direction.

Thank you for helping me change my life!

(b)(6)

ITT Technical Institute
311 Veterans Highway, Suite 100E
Levittown, PA 19056

May 3, 2016

To whom this may concern:

I am an ITT Tech graduate of the (b)(6) program. I graduated from ITT Technical Institute, Levittown PA in (b)(6) with an overall GPA of 3.85. My experience at ITT Technical Institute prepared me for the real world. ITT Tech offers real world experiences such as labs and workshops that helped prepare me for the reality of IT. As an ITT Tech graduate, I feel adequately prepared for the IT environment and my professional career. I gained experience with the latest technologies and operating systems that are currently in production today. Due to all of the hands on learning that I gained from ITT Tech, I was seen as a serious candidate by organizations and businesses to be hired as a full-time employee.

ITT Tech offers excellent academics that are current with the latest technologies, and they help students professionally as well. Resume writing, portfolio building, and mock interviews are just some of the key elements that ITT Tech offers to help prepare students for their careers. I use my portfolio to this day and add to it to build up my resume with all of my latest accomplishments and skills. When you graduate from ITT Tech, the school never leaves you. To this day, my former teachers, academic advisors, and financial aid representatives still keep in contact with me. They are always available for any help and guidance that I need. ITT Tech helped me gain confidence in myself and my career goals which helped me move on to the next level of college. I would recommend ITT Tech to anyone who wants to learn real life experiences by doing hands on training and academics.

Sincerely,

(b)(6)

The letter of my overall experience at ITT Tech.

5/2/16

To whom it may concern,

I am currently a student at ITT-Tech in Levittown, Pa. I will be graduating in (b)(6) of (b)(6) with my Associates in the (b)(6). I am currently working at (b)(6) in (b)(6). Career services has been working diligently to start me in a position in my field. The individuals that work in the career service center are excellent. They keep me informed of where they send my resume. If I have any questions they are always there to answer them. I have had such an excellent experience at ITT-Tech. I love the fact that I was taught all my courses by individuals who have worked or still works in the field. All of the teachers are absolutely terrific and very helpful. They are always checking up on you to make sure that you are doing well, even if you do not have them as a teacher that semester. The general education teachers are excellent as well. They are well experienced and knowledgeable in the courses that they teach. They are always offering to help. For example, if I write a paper that needs to be looked over the composition instructor would proof read it and give me feedback at any time. The people in the office are always helpful. I love the fact that there is a computer technician always available to help with any kind of computer malfunctions. The open door policy is a great policy. The computer library is awesome. I love the fact that I am able to go to the school at any time to do my work and that there will be someone in the library to help me. I thought that going back to school after 14 years was going to be extremely hard but everyone that works there has been extremely helpful and encouraging that now when I graduate I will be graduating with a 4.0. I never would have thought that I would have enjoyed school as much as I have in the past two years. I will never forget my experience at ITT-Tech and will always be thankful for everything that they have done for me. It saddens me to see the criminal justice program come to

ED-000097

an end. It is an excellent program taught by smart and excellent teachers that have extensive knowledge in the field. Words cannot even express how amazing this school is and how it has made me a better person and more knowledgeable in the field that I am going into.

Thankyou,

(b)(6)

A large rectangular area is redacted with a yellow background and a purple border. The text "(b)(6)" is written in the top-left corner of this area.

My name is Tania Cuevas I attend ITT-Technical Institutes (b)(6) My experience was amazing journey. I was taught by the most experience people in my field of study Information Technology. A career service was able to place me in a life changing opportunity (b)(6) to graduation with (b)(6) Where I worked for 2 years and then decide to pursue other opportunities. I am currently employed as (b)(6)

Since the first time I step foot in the institute I knew my life would change. From my experience with Representative Lisa Barnabei who took her time to explain why it would benefit me to choose ITT-Tech. And in the classroom experience where teachers taught me hands on what I would encounter out in the field. Every day I was challenge and taught to understand the inner working of the field Information Technology. They provide real world scenarios to troubleshoot hardware and software issues. I was also taught how to configure networks from beginning to end. In order to become the professional I am consider to be today.

I am strong believer in this Institute that I encourage my own family to attend. I am very proud to say (b)(6) will also graduate from ITT-Technical Institute in June 2016. I am always recommending ITT-Technical Institutes be to a person to change careers or an employer to hire.

Sincerely

(b)(6)

Tania Cuevas

(b)(6)

To whom it may concern,

I was asked to write a short letter about my experience here at ITT, to that end I'd like to start with the faculty here. The vast majority of the staff here are wonderful, going above and beyond when it comes to meeting student needs. Many of the instructors are very good at noticing when a student needs additional help and nudging them towards it, whether it's in the form of increased classroom participation or tutoring outside of class. Which many of the staff also provide immediately after class as well as at posted tutoring times. I feel that I have learned a great deal since I started here about 20 months ago and not just on subjects directly related to my CEET program. I've been given a toolbox of skills and strategies to help organize myself and my work, I feel more capable and better readied to work in a professional environment because of classes like Strategies, and Composition.

In field classes have been a fun, I've had a lot of hands on training most of which I think will be relevant and applicable to many of the potential career fields I will be looking to get into, as I work with Career Services. The facilities have never been a problem, and class size has never caused issues such as having to wait to use equipment to run a lab/experiment. I definitely take notice that materials and resources are kept up to date as needed assuring that what we are learning is relevant post-graduation.

Overall I'd rate my time here at ITT as a 9 out of 10 leaving room for improvement as all things should, but surly a positive life experience.

Sincerely,

(b)(6)

Sean Casey
