

To who it may concern, my time at ITT- Technical institute has been one with a great urge to find more knowledge. The knowledge to be able to go into the real world of my field and have the confidence I need to be able to clinch a job spot. Also, the instructors do a phenomenal job of teaching us the material for the day and giving us a helping hand when it comes to lab time. They also do a good job always giving us the information we may need to get into contact with them if we should be absent for class.

In addition to that, our instructors and the rest of the ITT-TECH staff have done a great job in letting us know the policy for missing multiple days of class. As well as the consequences that may occur if you miss more than the allotted days.

ITT-Tech has provided me with a well-rounded education that has given me the opportunity through, the materials covered, the instructors, and the Career Center, to help secure an Internship with the (b)(6)

(b)(6) Materials covered in the first three quarters have given me an opportunity, very early in my Information Technology career to succeed. The staff at the school has been very helpful in providing whatever resources are needed to see that we not only succeed but to also thrive in our new career path. Every time I have needed something from the staff, they were more than willing to help out and to make sure that the item was seen through to the end. The instructors have been very knowledgeable in their respective fields and have pushed us to higher standard. The instructors have a genuine interest in seeing us through not only school, but also into job placement. This has been a positive experience for me thus far and will only get better going forward.

Sincerely,

(b)(6)

ITT is helping me achieve my goals for myself. I love to learn new things and acquire new skills. ITT is helping me meet all of this. The instructors here are quite helpful with any questions that I might have class work related or not. That's the thing that I like the most about ITT. There is so many people here to help me achieve the goal that I have set for myself. ITT is also creating job opportunities to help me grow not just job skills but to grow as a person also.

Zackery Fairbanks

(b)(6)

To whom it may concern:

In my year at ITT- Tech I have had a great experience. The instructors have been awesome. When they see me having trouble they offer to help me and come in on their days off to help me. Sarah in the LRC is wonderful she is so knowledgeable. Mr. Carter is always helpful if I don't understand he takes the time to explain it. Mr. Renno is awesome as well I struggled in his class but he always made time to talk to me and help me with whatever I needed. Amy Wails the career source person has been great she has helped with my resume and is helping me find a job in my field.

There are many other instructors that have helped me along the way. The instructors know what they're talking about they are very knowledgeable in their prospective fields.

Thank you

Susan Wike (b)(6)

Jeremy Raines

The way that ITT-Tech has help me. To be better at my character, knowing the different kinds ways to act around people. Know how to reach other people, just knowing the roles that people play all of the time.

Having more education to have a success job, and working with other people without stopping them and having to ask the boss what do they mean? Even with ITT-Tech, some people may have more education then you do but asking questions does not hurt anyone. The more education the better.

The more education that I have the more jobs that I may get. That is another reason why It helped me.

To me either way, having small class rooms, having less chances on meeting people. Having bigger classes, in the long runs you have chances on meeting more people. Either way you meet people, working in the work force, it seems like that they you can't meet anyone, even thought that is not my reason on being there.

I think that It is a success to my future.

(b)(6)

To whom it may concern,

In my time at ITT-Tech, I have had the pleasure of learning from some very extraordinary people. One of these Instructors is Krystal Girton. She has always been very upbeat and positive about her class and what she is teaching. I look forward to her class, where we are learning to work in a group environment. I believe it is very important for the instructor to make the subject interesting and to keep the students involved and Mrs. Girton does a very good job. I am never bored or lost and this is due to her ability to engage us in the curriculum.

I believe that all instructors should be able to teach the given subject with confidence and a thorough knowledge of the subject matter and Mrs. Girton definitely does this.

Thank you.

(b)(6)

Linda Smith

My time going to ITT Technical Institute in Kansas city, Kansas was both fun and a good experience. All the instructors and staff was very helpful and with any questions or problems I had. Going to ITT has gave me the knowledge to improve my skills and has give me the opportunity it advance though IT career. Prior to going to ITT I had basic computer skills landing me in basic tech. After Starting ITT I start climbing to the ranks to where I am now as the (b)(6).

To Whom It May Concern:

My name is Jerad Riggin and I attended ITT Technical Institute, in Kansas City, Missouri. I received a Bachelor's of Science Degree in the program of (b)(6) This degree has changed my life.

Sometimes we forget to thank the people that have helped change our lives. I want to thank the administration, faculty and for the academic support I received during my attendance. I knew that everyone had my best interest at heart.

I design and support IT infrastructure for a major enterprise, (b)(6) My salary is (b)(6)

This has afforded me the life I dreamt of. I have traveled to Mexico several times, and to Korea. I live in the fashion that is very rewarding. If I want to go to Denver, Colorado, or to Los Angeles, California to a concert I have the resources to fly and stay at nice accommodations. I have a trip planned for later this year to Ireland. I am living the American dream.

I have made what I consider a life- long friend that also attended ITT Tech. I was taught a strong foundation on which I could continue learning in my job and be productive. This experience as I said earlier was life changing!

Thank you ITT Technical Institute for all that you did for me.

(b)(6)

Jerad Riggin

May 2, 2016

To whom it may concern;

I am writing to you to discuss my experience here at ITT Technical Institute in Austin, Texas.

As a current student of the Austin Location and a former graduate of ITT Technical Institute, I am pleased with education I am receiving. I have enjoyed the interaction that the staff has given me as I have sought to increase my vocational abilities.

From the moment I entered this institution, I have been helped to resolve all my concerns regarding coming back to gain more education. I was able to work with the recruiters, finance, and administrative staff to help me pursue a career in drafting. After the instructors had taught me core skills and tools of the trade, the career services helped me find an employer who is able to work with my hectic schedule.

Also my time here has allowed me to study under people who work in my same field. Their guidance in my education has aided me in be able hone my skills in drafting and design. They have also informed me of the culture, mannerisms, and expected skills that allowed me to break into the drafting field. But most important to me, they give me access to skills, knowledge, and resources that have allowed me to be creative and productive in my passions and hobbies.

I believe that ITT Technical Institute in Austin has helped me succeed in my educational, vocational, and personal goals thanks to their wonderful staff. Both my family and I will benefit from my time here at ITT Technical Institute in Austin. I would recommend this school to anyone truly has a passion for learning.

If you have questions or would like to contact me, please feel to contact me.

(b)(6)

Why I like ITT Tech

By

Justin Yaklin

I started in the (b)(6) Degree program now I am in my (b)(6) of the (b)(6) Bachelor's Degree program at ITT Tech Austin. I have really enjoyed the time I have spent going to school because I have always been interested in learning more about the inner workings of computers and networks and also how to make sure that they safe to use and protected from harm. The education that I have received assists me in my job every day and I have created a fantastic network of people that I can rely on in my future endeavors.

I have a deep appreciation for the instructors at ITT Austin because they all work in the field and have firsthand knowledge of what they are teaching. They are able to answer questions ranging from simple and basic to very in-depth and are willing to take the time to explain themselves in a way that is both practical and knowledgeable. I very much like that the class sizes are smaller than most college classes this way there is more personal interaction with the instructors. I respect the fact that the instructors, office folks, and the Dean and her staff are always here when they say they will be here. They are here until 11pm every day and weekends while most of these people also work 40+ hours a week at their other jobs. It says a lot about these individuals to be willing to put forth so much of their time to ensure that all students receive the best education and have the best possible school facilities. I will always look fondly upon my time and education at ITT Tech Austin because of this.

Thank you.

(b)(6)

Justin Yaklin

2 May 2016

To whom it may concern:

ITT Tech is a school that offers a real world education in topics that will enable the student to be an asset to any employer. This is achieved by ITT-Tech employing good instructors that are knowledgeable about real world situations and what is expected by employers. They can easily teach these kinds of values because they have all been employed by very successful companies, this allows their education to go beyond academia and into real world applications. I feel that this realistic approach is better than most Universities, who have a tendency to teach things that are only relevant in the classroom.

The classroom sizes are appropriate and are conducive to learning. The small class sizes allow for one on one time with the instructor and that makes it very easy to make sure the student has a good understanding of the material. It makes it possible for individual students to ask questions during the lecture to gain a clear understanding of what is being taught. I greatly appreciate the small size of the classes.

This school allows students to learn lessons in a hands on fashion. The classes have labs that allow the student to not only read and take notes about the subject but to also do the material and this allows the student to gain a much better understanding. This is also done with the way assignments are done, when the instructors go over the questions, and apply the material to things that are actually found in the work place. ITT-Tech offers a great education that allows students to be greatly employable when they are finished.

Steven Eslinger

(b)(6)

To whom this may concern,

ITT-Tech

ITT- Tech is a wonderful school full with teachers ready to show you what to do when it comes down to your degrees. Along with wonderful students that some time down the road become your colleagues, and show you how to work as team from the start of school. Compared to some of the class I've been too in University's, where the class is a hundred plus. Almost no time with the teacher one-on-one, classes that only last an hour long, and almost too little time with teams. ITT class last five hours long, and class are at 42 people max sense I've been coming to school. Teacher always welcome questions through class, and with no rush. The labs are setup to help show what you would be working in the field. Something I find wonderful about ITT is the online bookshelf. Because, one thing is that books come out of your pocket taking all your bills. They also have a career servicers helps you find a job in your field and help you with your resume, and get your foot in the door.

05-02-2016

Dear whom this may concern,

I'm a current student enrolled at the Austin Texas ITT campus studying Electrical Engineering. As of today I am halfway through my third quarter here and I can proudly express my satisfaction with the curriculum and environment that the school provides. ITT has held the practical education that coincides with the theoretical studies almost seamlessly. This being the reason why I decided to enroll and attend this school. A task seeming complicated at first glance, made easy by the staff in the recruitment and financial aid department. Walking into my first quarter, my work experience in the industry was limited to retail mobile phone repair. The career services team, who tirelessly worked to aid me in achieving my goal of leaving the retail setting and today I am currently working as a (b)(6)

(b)(6)

Best Regards,

Jake Pattinson

(b)(6)

My name is Ashleigh Hall. I am currently in the Associate Electrical Engineering Technology program at the Austin Campus. My experience here has been amazing. I feel like this school is my second home (I usually spend more time than I do at my house). The Dean, Dr. Bradley, from day one has made me feel welcomed and wanted. I know if I ever need something all I have to do is ask her. The Electronics Chair, Mr. Johnston, always says "Hello" and asks me how I am doing. When he substitutes, the way he teaches helps me out a lot.

My DCAC and now current Integrated Circuits teacher, Ms. Rosales, is kind and patient. She knows what she is teaches is not easy to pick up and she explains it until everyone understands. She is always willing to come early and help us when we need it. My Physics and current Digital Fundamentals, Mr. Sharp, makes each class fun and interesting, which keeps me awake and focus later in the night at around 10:00 pm. He is always here and willing to go over concepts and homework.

My representative, Ms. Carol, checks up on me once or twice a month to see if I need anything and how classes are going. She really cares how I am feeling and how my life is going. My financial advisor, Mr. Tony, helped me feel out my FAFSA and made it all make sense. When I did it on my own, I was so scared I would mess up that I did not complete it and then I came here and they made easier on me and my father who had to apply for a loan. Ms. Arcely helps me accommodate my schedule so I am able to go to my classes. I know my schedule is not always the easiest to meet and I know I start to worry and bug her but she never let me see it.

Everyone is so nice and willing to accommodate so I can reach all of the equipment and get to all of the tables since I am in a wheelchair. I feel I can talk to everyone here about anything that is happening in my life and I know would care.

Sincerely,

(b)(6)

Ashleigh Hall

To whom it may concern

ITT Tech is a great place to learn technological theory. There is a systematic step by step approach to learning here. They don't baby you, will get out of it what you put it. The classes incrementally get harder so they kind of build you up. After two years I feel very confident about my skill set and my future.

(b)(6)

Aaron Moran NSA

This letter explains all of the good things that you experience at ITT-Technical Institute.

ITT-Technical Institute's staff and the instructors are very friendly and easy to talk to. This includes the Representatives which are usually the first ones you talk to when joining. Then Finance will assist you with your financial needs i.e. loans, grants, financial aid, etc. The Registrar is there to create your schedule and do their best to make sure it fits your personal life's schedule. Career Services is also available for you, they will sit down with you and assist you with your resume and try to find out what kind of career you are looking for. Career Services will help you find the right career that fits your needs.

The instructors are there for you if you were to find yourself stuck in a situation you could easily talk to them and they would be more than willing to take the time to assist you and point you in the right direction. If you have a personal issue with an instructor, the Dean is always available, even if not in person you can always email the Dean and she will respond back to your issue and figure out everything she can to correct the issue. The instructors are the same way if you have an issue in the classroom you can email the instructor and they will do what they can to correct the issue.

All of this I have had the honor and privilege of dealing with while attending ITT-Technical Institute. I would and have recommended this school to some of my other

Christopher Ploe Network Systems Administration

peers and they have found themselves in the same situations. I think very highly of this school and the staff and the Instructors.

Thank you

Kerry M. Sleeter
ITT Technical Institute, San Bernardino, CA

May 2, 2016

To Whom It May Concern,

I've been enrolled at ITT Technical Institute since the (b)(6). In that time I have earned my Associates Degree in (b)(6) my Bachelors of Science in (b)(6) and am currently completing the coursework for my Bachelors of Science in (b)(6).

Over the past four years I have grown in so many ways thanks to the education that I have received here at the San Bernardino campus. I've learned skills that will and have helped me in the real world. I've grown both personally and professionally, and gained a belief in myself that I didn't have before.

Earning my Associates Degree in Drafting and Design enabled me to get the job that I have today.

The classes I've taken here have prepared me for the day to day tasks that are associated with Project Management. Beyond that, the classes have taught me how to deal with all different types of people and personalities, and become a better leader.

One of the most important things I've gained by attending ITT Technical Institute are the friendships and relationships with the people that I've worked hand in hand with for the past four years. From the students to the teachers to my financial aid advisor. Without them and the different things they've taught me, the experience would be incomplete.

I'm grateful for the time I've had here at ITT Technical Institute, San Bernardino. Though sometimes exhausting and frustrating as school can be, it's been something I've looked forward to at the end of my day since I started coming here.

Warm regards,

(b)(6)

Kerry M. Sleeter

To whom it might concern:

Hi My Name is Francisco Olivas and I'm currently attending to ITT-tech San Bernardino Campus. I enrolled at school on (b)(6) and have keep going with my education non-stop since. I have graduated with an Associate in (b)(6) and follow for the (b)(6) (b)(6) Bachelor Degree.

ITT-Tech have given me the opportunity of increasing my level of education and knowledge about things that I have only a notion on the pass. I currently work for a (b)(6) (b)(6) I started on that company has a (b)(6), and quickly move up and become a (b)(6) (b)(6) my-self and was able to work solo. The owners give the opportunity of improve my-self and learn more and more. When I signed up at ITT-Tech they saw that I wanted to be more than just a service technician, and this lead to a promotion to a (b)(6)

Thanks to all the amassing and capable instructor that were able to teach and lead me to the correct path I was able to share some of that knowledge with coworkers and better my-self and help other do it.

The San Bernardino Campus is the closet campus that I had, and when I originally visit the facility distance was my main concern, but all the effort has been paying off. The campus has accessibility to several computer labs and LRC were can connect to internet for research some physical books. All instructor are well prepared and are willing to help any time you need.

After almost 4 years of continuous school and education feel like I'm part of the staff of the institution, I know most of the instructors and they know me as well. I will definitely encourage anyone to visit and check all the options that they can offer.

Thanks

Francisco Olivas

(b)(6)

To whom it may concern:

Juan Rodriguez

Associate (b)(6)

Enrolled Bachelor Science (b)(6) Expected Graduation Date (b)(6)

Employer (b)(6)

This letter is to inform people why I chose ITT Technical Institute. The year prior to me enrolling to ITT Tech I was a Commercial Truck driver I spent over 300 hundred days on the road and felt like I needed a change. (b)(6)

(b)(6) For me personally it was something I wanted to accomplish for my mother since she wants me to go to college after high school.

In February 2014 I came to ITT Technical Institute in San Bernardino I spoke with Michael Johnson the representative at ITT he made me feel welcome and said all the classes were taught on campus and it was three classes per semester. I tried another college before hand and they had me going to different locations and I felt lost I haven't been to school since the age of 18 so I was quickly discouraged. I felt comfortable here so I chose to enroll and in March of 2014 I started my Associated Degree for Network System Administration. The reason I chose this program is because I had a love for computers since I was introduced to them in the third grade and wanted to learn more. The teachers here at the school take time with me and other students so the students understand the curriculum. There are many instructors here and the one teacher here I praise the most is Mr. Danforth while I worked on my associates degree he took time during the class to help us with our labs and even after class he was always approachable and took time to help me.

I am not a spokesperson for this school, I tell students who enroll are currently enrolled to use the surveys as a guide to get things to change here at the school or if you have an issue with instructor. I do understand that I am an adult taking endeavor into getting my education I need to make sure I have the support of my family first before continuing my education. I understand college is not free and I am the one responsible for paying my education. One time Mr. Brown the chair for Business came in and told us if there any issues that may arise during our time working on our education to let him now and he will do what he can so that we don't drop out. That to me shows so much integrity and compassion to the students. We're not looked as numbers where people who want to expand our horizons and he wants to help and get us there. I have nothing but positive remarks to say I feel great knowing that I graduated with my associates and soon I will complete my Bachelors and I have to thank the staff and instructors.

Sincerely,

(b)(6)

Leonel Maldonado

5/2/16

(b)(6)

Discussion:

The reason ITT Technical Institute was the right choice is for the reason that they help you through everything from financial aid, classes, and looking for a job. The classes were all chill and the teachers are always there and always answer any problem you may have and they go step by step with you guiding you through the whole lecture or the problem you have. They also know what they are doing for the reason they work in their field, so they could offer an insight on what you can expect working in the field. During my time here in ITT Technical Institute I found they encourage you to help your fellow class mates and also work as a team which I found weird at first for the reason that I didn't socialize with anyone.

Sincerely,

(b)(6)

Leonel Maldonado

May 2, 2016

To Whom It May Concern,

My name is Stephanie Tagaloa and I am a current student of ITT Technical Institute. I will be obtaining my associates in (b)(6) I will also continue my education in the (b)(6) with ITT Tech. to obtain my bachelors in (b)(6)

Like some of you, I was doubtful of ITT Tech. whether or not that I would gain the education and skills needed for my future career. Whether or not that this institute was true to their word and that I was wasting my money. I started out in a community college and gained nothing; I felt that I was wasting my time, money, and effort in the classes that cared nothing of me. Which is why I thought the same would happen when I would become a student of this institute, but I was wrong.

ITT is concerned for you, your education, and your future. They (staff and all) want to make sure that everything and anything can help to further your education and skills. Everyone is helpful and provides great service when they know that they do not have to, but instead they want to. Professors' lectures are as important as the assignments due to the fast pace quarter system. Professors here will work with you if there are issues with the students outside of class. No professor at a community college or university would do the same unless you are teacher's pet. This is not high school anymore, we as students and grown adults are trying to move our way up in the world, and ITT Technical Institute understands that.

I, as a student of ITT, have yet to be doubtful since the beginning of my first quarter here. ITT has not let me down, nor the current students and the alumni down. So please reconsider what it is that you are about to do to hundreds of other students who are trying to do something with

May 2, 2016

To whom it may concern,

ITT has taught me some very valuable lessons that I am confident I will use in my career. I have professors who teach part time and work in the field that the students are trying to get into. Those professors are very experienced in the field that they are in and they try their very best to give advice to succeed in the future. I am confident that I have learned more valuable lessons in from these professors than any online course could have ever given me. The material itself is also very fast paced as one would expect from an accelerated program. Even though it is very fast, ITT is not trying to push students out; if you want to do well you have to give it your very best effort. These fast paced, rigorous courses, have helped me in prioritizing my work load and personal life altogether. I am proud to have my name on the wall for Highest Honors because I worked very hard on getting those grades.

Sincerely,

(b)(6)

Jacob Cornelius

To whom it may concern:

My name is Jennifer O'Donnell I am a current student who will graduate (b)(6) with my Associates Degree in (b)(6) I have been attending I.T.T San Bernardino, CA about two years. With my experience attending I.T.T has been pleasant. Instructors are very well educated and know what they are teaching the students. The information is very helpful not only in the classroom, but also outside of the class room. I also work as a full time (b)(6) for a non-profit company titled (b)(6) (b)(6) The information taught at I.T.T. allows me to utilize it on a daily basis in my current field. I am signed up to attend I.T.T for another two years to advance my education with my Bachelor's Degree in (b)(6)

Sincerely,

Ms. Jennifer O'Donnell

(b)(6)

May 2, 2016

To whom it may concern,

My name is Adelina Luna I am a current student here at ITT Technical Institute in the San Bernardino Campus. I have been a student here at ITT Tech since (b)(6). This school has been beneficial to me since I have learned new techniques in the clerical field and helped me so much. This school teaches us technical skills as well as business skill that are needed at in the business field. I been here as a first time student in college I have learned and accomplished with honors and highest honors. I made this possible with the help I obtain from professors, staff and classmates. The other thing that I like from this school is that they offer student scholarship when you have good grades.

The schooling here at ITT Tech has convenient hours that are just right for me, and besides it is close to home. Why it is convenient because I am a (b)(6) and my schedule is a bit overwhelm but I am glad that hours are great. I am also employed at (b)(6) and my position there right now is a (b)(6). This job is also helping me to have current clerical experience and helps me enhance what I am learning here at ITT Tech. I also would like to continue here at ITT Tech to receive my Bachelor's Degree since I will be already graduating for my Associates Degree in (b)(6). Overall I like attending to this ITT Tech College and will like to continue attending here for my Bachelor's Degree.

Sincerely,

(b)(6)

Adelina Luna

To whom it may concern:

My name is Manuel Medina and I have been a student at ITT since (b)(6) I enrolled one month before getting out from my (b)(6) I have to say this choice of attending school has been one of the best choices I have done in my life. It was a time in my life where I was upset and sad because not everything turned out to be the way we have planned. So, I enrolled in ITT and I felt very welcomed. The instructors are awesome and they help you, there is no way they leave you alone, and if they don't know the answer they will find it for you.

I graduate in (b)(6) with my associate's degree in (b)(6) and I already enrolled for the bachelors program. There was no need for me to look for another institution, I am comfortable here and I know this journey will be successful. With the help of my instructors, I will obtain my Bachelor's Degree in the near future.

Very Respectfully

(b)(6)

Manuel Medina

5/3/2016

Roxann Englert (b)(6)
Student of ITT-Technical Institute

(b)(6)

To whom it may concern;

My name is, Roxann Englert, I am a full time student at Portland, Oregon ITT-Technical Institute. I started in (b)(6) and will be graduating this (b)(6) I chose ITT-Tech because the Electrical Engineering program was exactly what I was looking for. They also offer evening/night classes which allow me to work full time. In addition to that, they gave me a scholarship and helped me with getting financial aid.

ITT-Tech has been the best decision I've ever made. The professors and staff at this school want nothing more than to see us succeed and they go out of their way to help you. Kenneth David was one of my first professors, teaching us Strategies for the Technical Professional. He gave us so many tools towards our success. I had no clue how to do a PowerPoint and now I receive compliments on my presentations, along with my APA papers. The excitement and energy he has, made me more excited to learn and succeed. Still today, he helps me and keeps me excited about my success. Every professor I have had has always been there to help and ~~egger~~ eager towards my success.

Those equally important towards my schooling success are Mary Packard, Chair School of Electron Tech, she has gone out of way to re-coordinate my classes, due to my health reasons, to keep me in school and able to graduated. Including her stepping up to teach me a course one on one, which there's not enough words for how grateful I am towards her. Mary also gives me such fun projects to do. Another is, Bryan Hunt, the Associate Dean, he has been a great professor, as well as, always being there for me, for help, input, and just to talk to. Mrs. Lcc Anna Knox, the Dean, is another who has helped me. She knows who I am and keeps at to me to stay on the "The Dean's List" each term. I am also grateful to her for helping with Mary Packard in coordinating my class and keeping in school so I can graduate.

My life has and will change so much since I've gone to ITT-Tech. I have learned so much with all the hands-on teaching, all my wonderful professors, along with other student who help me along the way. The career staff also is getting my resume out to employers to aid in my new career life. All my success had been due to this school's professors and staff to which I will forever be thankful and grateful to.

Sincerely,

(b)(6)

Roxann Englert (b)(6)

Student of ITT-Technical Institute

Student of ITT-Technical Institute

To whom it may concern,

As a former student of ITT-Tech I would like to express my gratitude. This institute has allowed for me to gain a steady progression, professionally in the Information Technology field. Through the structured environment at ITT and the skills taught at ITT Tech I have been able to achieve great success as a professional. The professionalism demonstrated by this organization semester after semester never went un-noticed and has helped me achieve possibilities I never thought would be possible, coming from a construction and drilling background. I look forward to passing the invaluable skills I learned on to others as well as continued success throughout my life and career.

Thank you,

Michael Elmore

(b)(6)

I would like to express much thanks to the following teachers that made the biggest impact on my professional development:

- Randy Klug
- Jim Wallace
- Henry (Tony) Wolf

To whom it may concern,

My name is Logan Doerfler and I would like to provide you with a synopsis of my experience at ITT Technical (033 Portland, OR) thus far.

Allow me to start from the beginning. (b)(6)

(b)(6)

(b)(6)

I grew increasingly anxious knowing that I needed to continue my education to meet my goals, but had made no tangible obligations or efforts towards them. That was when I saw a simple ad for ITT Technical while browsing Google Chrome. Curious I looked into this school and was quickly impressed, so I filled out a contact request. Not even 15 minutes later I received a friendly phone call from Mr. Debusman. Mr. Debusman invited me to come to the school for an interview so I scheduled the interview and a few days passed.

I arrived at ITT technical for my appointment and I remember noting how incredibly clean campus was. For weeks, I had been touring campuses but none had been as tidy or up kept as this; as a man with military values I truly appreciate the discipline they keep in maintaining cleanliness. Anyway. When I arrived Mr. Debusman quickly saw me and we began our interview. The way he approached our conversation sparked additional interest in ITT. He cared about my goals and ambitions and showed me how ITT Technical could set me on a path to success if I was willing to attend and apply myself. He was the first of many staff members I interacted with at ITT Technical and I have to say he was a major asset in my recruiting process.

Fast forward a few months into my second term (Winter term) I had built a relationship with the student VA liaison rep. A positive and frank individual, he helped me deal with the VA and get my issues sorted out. With his help I was able to get the courage to deal with the VA & get my issues started taken care of. His position is blessed off by the staff here at ITT and is greatly appreciated by myself and other veterans as well. I am currently in training to take over his position after his inevitable graduation this summer. I aspire to be as much an asset to others as he was for me.

Continuing on to staff. The faculty here are not only the most professional group of individuals I have dealt with as a whole, but have also been quite flexible, understanding, patient and candid with me. These things together have enabled me to achieve an accumulative GPA of 4.0 thus far. That fact should not be taken lightly, however, because the curriculum here at ITT Technical is nothing to scoff at. I am a student in the NSA program and it has been a challenge, but with my reliable study partner, dedicated staff and exceptionally formulated materials the learning process has been swift.

I sincerely wish the reader(s) an outstanding day and hope this provides some insight.

Respectfully, Logan Doerfler

Signed: (b)(6)

May 02, 2016

To whom it my concern,

My name is Brandon Hogan and I am writing this letter to speak about my experiences at ITT Technical Institute. My wife and I decided that at (b)(6) we wanted to go back to school to help further our career and after looking in to the schools around us we picked ITT Technical Institute. There was a couple of reasons for this choice. First was the hands on portion, we both felt that would be more valuable to us then just reading from a book and as it turned out the hands on portion had added benefits. One benefit was the one on one time with our instructor's during the labs and also the relationships that we made with our instructors, which I will never forget. People like Ken Luchini who would always make himself available if I or anybody else needed him. He taught in the electronics program but what we found was that his desire to help and push us to succeed was not limited to that department. Our math instructor Annic Bregmen who would come in early before her day job to tutor me then go to work only to come back and teach my class later that night. I truly believe that without these people and others I wouldn't have not done as well as I did.

The second reason we made the choice in a school that we did was the job placement aspect. Having people that worked there ready to help with the entire job getting process seemed like a plus but again we found other benefits. The biggest benefit I have found was the opportunities to network with professional in my career path. Between these two aspects I have obtained a career (b)(6) and my wife now works in (b)(6) I truly believe that if it was not for this school, and the outstanding staff that work there I would not be where I am today.

(b)(6)

Brandon Sean Hogan

My name is Brian LeStah and I am a student here at ITT-Tech Portland Oregon. I started my journey here in (b)(6) I recently came (b)(6) and spent a year going to PCC. In that year time I learned nothing and felt that I wasted a year of my tuition. I then saw a commercial on T.V talking about ITT-TECH. So I did a little research on the school and talked to a few of my friends who went there and they told me about how well the instructors are and that they care about the veterans that attend the school. So I met with the recruiter and after a brief tour of the campus and a sit down I decided that this was a good school.

Well here I am less than two months away from graduation and have enjoyed my time here at ITT-TECH. One of the things that the school has allowed me to do is be the Veteran representative for this school. To me any school that wants to take care of its vets is a school that I am more than proud to be a part of. In fact, once I graduate I tend to return to the school to continue my education in the hopes to not only get a higher degree from the school but to ensure that all future vets such as myself understand how much this school takes care of it vets.

(b)(6)

Brian LeStah

1/5/2/2016

Dear Sir/Ma'am,

My name is (b)(6)

(b)(6), and I would like to share my ITT story.

In (b)(6), I

was a (b)(6)

(b)(6)

(b)(6)

After finding no success with work, I came in for a tour of ITT one day and was immediately signed up for their (b)(6) in their Electrical Engineering program. They helped sign me up with the 6-1 Bill, then gave me resources for disability & housing.

Even though I was (b)(6)

~~causing~~ causing me to fall behind a little in

my classes, they took the time to help tutor me & catch me up on my missed work!

I have never had an educational experience like the one I have had here. They really do care. I am now in stable housing and in my (b)(6) I am very grateful to the teacher & staff at the Portland campus & would recommend this institute to anyone looking to pursue their academic dreams.

yours in
service,

(1)

(b)(6)

May 2, 2016

To Whom It May Concern,

Becoming a student again was a big decision that I did not come to lightly. I weighed the pros and cons on whether to attempt a program that was completely out of my natural comfort level. The constant tug and pull of the, should I or shouldn't I were put at ease the moment I came into the campus to speak to someone about the school. The person I spoke with was Erik Petersen in recruiting. He was very friendly and had an easy nature about him which allowed me the confidence to ask questions about the school and the program. With each question I asked the more I felt that ITT would be the right fit for me. During this time he gave us a walk through in order to give us a better feel of the campus building.

During the initial walk through I came face to face with one of the instructors who would later become one of my greatest mentors on the campus, Mr. Michael Wheaton. At first meeting I immediately showed him examples of my abilities with sketching out floorplans, which in hindsight was the entire reason I even thought of drafting as a career move. Like a nervous kid on the first day of school I flipped through my journal showing him all my different hand-drawn designs and 3D views of different room placements. He was very gracious to me, being that it was a busy school day and spent time talking about my drawings and the program itself.

I knew from that moment on that I wanted to be a drafting student. Starting the first quarter I came to the realization that drafting no longer was solely done through the drawing aspect of conceptualization. It had transformed like all technology into leaning towards computer programs and computer technology. The most that I have experienced with the subject is basic

social media outlets, like blogging or photo editing programs. So the concept of designing a drawing within a program with key strokes was completely foreign and might I add a bit intimidating.

Thankfully the philosophy behind ITT allows for this newbie attitude and uneasiness. Many of the students attending the campus are students returning from a hiatus from higher education or first time students looking to create a career for themselves. I fall in the first category. After two years of being completely disgusted with the early child education sector and needing the big change I came to ITT.

The real reason ITT works for me is simply because everyone cares. Plain and simple. The students that you start the program with become family at least that is the experience that it has been for me. We help support each other and listen to each other in the moments that we need it the most. We network to help tutor each other in the areas that may need a bit more guidance. Unlike the other higher education institutions who are a bit soulless and entirely cut-throat, where you are nothing more than a number, ITT does a complete 360 degrees.

At ITT everyone cares. From the Instructors, to the Support Staff, everyone has an eagerness to help any which way they can. You are not thrown out to the wolves to sink or swim, if you have the aptitude and attitude of persevering against any obstacle all the Instructors at ITT will work with you.

I know this first hand simply with one moment in time. In my most weakest and soul crushing moment rather than worry about the general semantics that having to take a three week break to attend to the all of a sudden death of my father. Lee Anne the Dean told me not to worry to go and I can take care of everything when I got back or through emails. Having to not

carry that stress into an already highly stressed situation was one of the greatest kindness that anyone could have given me. I am eternally grateful to both her, Brian Hunt, and Mary Packard for working with me to keep me enrolled and getting all the paperwork and emails needed so I didn't fail that quarter.

The care and kindness continued the moment I got back and to this day with the forethought of allowing me to take the next quarter off in order to have time to grieve and asking me as to how I am doing at the beginning of each quarter since. Even allowing me to breakdown in her office a time or two. I can safely say that I would not have had this attention at any other higher education institution.

I have gained a vast amount of knowledge and experience through my education at ITT. I have learned programs that were previously unknown to my vocabulary. Each new computer program added to my arsenal of drafting capabilities has not only expanded my mind's internal information, it has also made me more viable in the current market. No information is wasted information. No class is a pointless or "fluff" class, unlike the filler classes that I took when I was first attending college. That is one of the biggest selling points is that I would not be wasting my time with taking classes that I would not need.

Honestly, I cannot say enough positive things about ITT. Well to be frank, the people behind Portland's ITT campus. From the staff to my fellow students who have made this process of returning to school a completely positive experience I can't thank them enough.

Sincerely,

(b)(6)

Name: Bobbie Casteel

Title: (b)(6)

Organization/aff (b)(6)

Mailing address:

Email address (b)(6)

Telephone nu

To Whom It May Concern:

I am Bobbie Casteel, (b)(6) and student at Carmel IN/Portland OR ITT-Technical Institutes (ITT-Tech). I completed the (b)(6) Degree (half online and half at Portland) and the (b)(6) Degree (at the Portland campus). During my time at ITT Tech. While at ITT-Tech I was able to able to apply the knowledge and skills I learned to challenge myself inside and outside of the classroom.

I completed NSA program while working as a (b)(6) and a (b)(6) (b)(6) They were for a large ship repair company and the biggest Athletic apparel company in the Pacific Northwest. During my time in the shipyard, I was responsible for 8 locations and over 4000 users and when I was working for they athletic apparel company I managed security systems worldwide.

In the NSA program the Networking classes, Linux classes, and all the server classes helped me maintain both of the Environments I was responsible for managing. All the NSA core classes were able to help me understand how to navigate, build and maintain an Enterprise environment better due to the knowledge of ITT-Tech's instructors. I was continuously able to improve my skills at an alarming rate. Every class I was able to take something I learned and applied it to my current job functions.

Once I left the ship repair company, I was able to work for the largest athletic apparel company in the NW and apply the Linux knowledge I obtained from the NSA and ISC courses to the role of (b)(6). I was able to manage the Vulnerability networking devices and all of our endpoint security devices across the globe. Since most devices use a Linux based platforms, I was able to apply my Linux I, Linux II, and Linux Security skill obtained in class to how I needed to manage the devices. Since most Security tools are a standard Linux base platform, these skills were crucial to completing my job.

When I had an issue at work, I was able to replicate the problem in class for my instructor. My instructor was able to help me understand the issue at hand and help me break down what I needed to do to fix it. The instructors are a critical part of ITT-Tech success in helping me grow. Their knowledge is something I couldn't find when I was looking to go to a community college.

With all the skills I obtained from my previous employment and ITT-TECH I now am currently and (b)(6) and an (b)(6) (b)(6). As a (b)(6), I am responsible for writing policies and procedures for clients and our private companies. I also conduct Risk Assessments, Incident Response plans, and Vulnerability assessments for our clients. I was able to utilize the Transfer of learning from ITT-Tech into my career.

The whole Bachelors program is relevant to what I am doing at this current moment in time and could go on for days how each course ties into my everyday job and life. I appreciate ITT-Tech for providing me with the amount of knowledge I obtained.

Being an (b)(6) has become a passion of mine. I love to teach students and give them the skills they need to grow. I can understand what they need in class due to I was in the same seat as they were at one point in time. Being able to give back what I have learned is important to me, and if ITT-Tech loses its accreditation, I am not able to continue giving back to the students I enjoy teaching.

I am currently studying for my (b)(6) (b)(6) and I have noticed that ITT-Tech's curriculum has laid the foundation for me to understand all the topics within the certification book. The farther I get in my career and the more I teach, the more and more I appreciate the curriculum provided to the students.

When going back to school (b)(6) you have many unanswered questions: How would you balance work and school? How would you do the homework? How would you keep (b)(6) while at school? And the big question a school that will allow you to fit in the job market as quickly as possible. After good thinking trying to answer all these questions, I discovered that ITT-Tech particularly ITT-Tech Kennesaw, GA was the answer: ITT Tech Kennesaw not only offers a high standard education but also it is a perfect fit for a working parent.

The education level and all the means put at our rich at ITT-Tech could only lead us to one thing: Success. When I started the school of Drafting and Design Technology, I was exposed in my first quarter to the most advanced and the best classes in the field. This fast start, which demonstrate the excellent time management culture at ITT-Tech, enable me to add quickly skills the job market in my field is looking for. This allowed me to work in my field while going to school.

Above everything, what I like the most about ITT-Tech is the customized care depending on each student. Every time you show up with a concern, there is always an accommodation. At ITT-Tech the concept or culture that you should not have a difficulty while going to school is prevalent. You are assisted in every situation from asking a tutoring to career services. Talking about Career services, ITT-Tech Kennesaw has the best. I would highly recommend ITT-Tech.

Best Regards,

Achille Amoussou.

5.2.16

To Whom It May Concern:

I am honored to have been requested to write a letter of recommendation on behalf of ITT Technical Institute in Kennesaw, GA.

I began my journey with ITT Tech during the (b)(6) to pursue a degree in (b)(6)

(b)(6) Even though I had taken CAD Drafting in high school and was very proficient with the drafting software, my instructors always found a way to challenge me and help me build my skills. During my tenure with ITT Tech, I was very impressed with the many different software programs we were able to learn and the hands on experience with each. My instructors were very knowledgeable about their specific areas of study and would take extra time to personally connect with their students and make sure we felt completely comfortable with a program or concept before moving on. I could tell my instructors genuinely cared about my future and career.

At prior universities I did not have the opportunity to have a truly functional hands on learning experience. I feel this is *extremely* beneficial in a field such as CAD Drafting and Design. Other universities offer a more "conceptual" learning experience with limited access to industry software. The heavy program based teaching method at ITT Tech is very beneficial when transitioning into a workplace.

Approximately (b)(6) prior to my graduation, I was offered an (b)(6) I was able to seamlessly pick up my tasks in both 2D and 3D parts drafting without issue. I am currently employed at (b)(6) I have recently moved into this role after being the (b)(6) I quickly progressed as an (b)(6) because I was able to efficiently read plans and specifications and had well rounded drafting skills and a knowledgeable working understanding of the construction industry.

Sincerely,

(b)(6)

Alicia Jones - (b)(6)

(b)(6)

(b)(6)

May 2, 2016

To Whom It May Concern,

My name is Xavier Ferguson and I am currently a full-time student attending ITT-Technical Institution in Kennesaw, GA. From the moment I arrived on campus in (b)(6), I immediately noticed a high level of professionalism. After exploring a bevy of options, I knew that I had found a home. I was introduced to every staff member in the building and received a complete tour of the entire facility. I have been a student at ITT since the (b)(6) and I can personally attest that this educational institution truly cares for its students.

The staff here at ITT-Tech in Kennesaw, GA is committed to excellence. I love the hands on approach that is taken involving each and every individual. Because it is more of a hands on environment, it allows the instructors the flexibility to apply real world business scenarios to their teaching curriculum. Every instructor/professor will go above and beyond to assist his or her students. All of this is made possible because of the leadership at the top levels, to include the Director and the Dean. They will do whatever is necessary to accommodate their students and facilitate the learning process.

Last but certainly not least, there is the Career Services Department. This program is the reason why I am currently employed. The amount of time and dedication to duty is truly amazing. They made sure that I had a professional resume built that proved to be instrumental in my success entering today's competitive business sector. The Kennesaw branch is lucky to have such an experience person running its Career Services Dpt. I will forever be indebted to this wonderful institution of higher learning.

Xavier Ferguson |

May 2, 2016

Here at ITT Technical Institute, we are a family, a team, a brotherhood, and a unity. As a student attending ITT Tech, I have felt the generous aura of my peers and my professors. When my college journey began, the staff and the fellow students of my class all came together so that everybody could see success. ITT Tech contains a structural learning environment and the staff here is hands on as far as being behind each student's college career and accomplishing things that barriers are supposed to barricade in education. My experience here has been enlightening and I recommend this learning facility to anybody who wants to take their next steps into the fields that ITT Tech has to offer.

ITT Tech has been a fundamental part of my routine. I was able to focus and understand the material being presented to me. The professors really strive to make sure you fully comprehend the information. They are all creative in their own way on how to relay the message of that subject.

I can say that ITT Tech was the correct choice to make and I know it will help me further my future substantially. The school maintains its positive stature and never fails to show progression throughout.

Yours truly,

(b)(6)

Kirby Carriman

May 2, 2016

To whom it may concern,

I would like recommend all those who are thinking of attending ITT Technical Institute, and who are on the fence, still undecided. This is Jeassy Thomas, and I owe my life to this institution. There can be negative speculations, and opinions about this school, but that is also true for any institution ever established from politics and religion to sports and art, but in my personal opinion, and personal experience, I have to say, that the staff here at ITT Tech, do not treat you like a number, like another statistic, like cattle. Throughout my time here, I have seen a deep and genuine care and understanding that the staff displays. Characteristics forged, through the crucible of Life, unique, sympathetic and empathetic to you, and your flaws. They are compelled by an un-natural sense of selflessness and pure and unadulterated love to help you succeed. Everyone, from the Dean, to the Financial aid staff, they will go out of there way, bend over backwards, to make sure that your experience here at ITT Tech, is more than just School, they make you feel like home, a home away from home. I have shed tears here, I have laughed here, made new friends here, I feel like I made a family here.

In this letter I would like to extend my deepest and sincerest appreciation, to Mr. Stewart, Jim Stewart. I cannot find words that can express to you, the caliber and moral Integrity of this God fearing man. All I can say is that, he is the one you want in your corner to get through this fight, he knows what to say when you are discouraged, and he has words of affirmation and praise. Pep talking you all the way, totally submerged in your education, pushing you if need be, but ever so kind and gentle. There were days where I felt like giving up, and if it were not for him, I would have thrown in the towel.

I can go on and on, relating to you all the fond memories I have made here, but all I can say, about me and ITT Tech and the fruition of the combined efforts of all the staff and all students...I was going nowhere before ITT Tech, and now I have found a sense of direction, a purpose in life. I have found my way, the ITT Technical way.

Sincerely yours

(b)(6)

Jeassy Thomas (b)(6)

It is hard to overstate the help that ITT TECH has made to my professional career. I attend ITT TECH Kennesaw the school of Drafting and Design Department .I had the delight of meeting cultivated and enthusiastic teachers. The school services staff is motivated by a strong sense of team and success, which inform through a nuanced and sophisticated understanding in you field of study and trends in the professional world. I can say with confidence that ITT TECH is one of the most caring and driven institution I've ever seen.

I believes passionately in ITT TECH. Through my own personal experience, I recommend ITT TECH.

Sincerely,

Kadi. Amoussou

(b)(6)

May 2, 2016

To Whom It May Concern,

I am a graduate of ITT Technical Institute Kennesaw Ga. I am currently the (b)(6)
Georgia based start-up that is currently six years established and has been ranked one of the fastest
growing companies in the Atlanta area. I am also the (b)(6)

(b)(6)

My experiences with ITT have been very rewarding and gratifying in terms of life enrichment. I started
my undergrad during the housing market crash. During this time job prospects were slim, mostly
comprised of hard labor type positions. This was not ideal for what I wanted in life so I decided that I
would go back to school for something I was passionate about.

My undergrad in (b)(6) and (b)(6) was a
rejuvenating experience as it helped to revive my excitement for technology. My instructors also had a
real passion for technology which was very meaningful to my own educational-experience. I was often
found at the school until they turned the lights out and closed the doors. Those two years were a life
changing experience that I will not soon forget.

One of my favorite thoughts on the past is that of sharing insightful conversations with the instructors
regarding infield topics. I have since continued my education and am now working on my Masters at

(b)(6)

Justin Lanning

(b)(6)

May 2, 2016

To Whom It May Concern,

As a current bachelor student and associate graduate of ITT Technical Institute in Wyoming, Michigan, I'm grateful for the admissions representatives and career services staff.

With their support, I was able to get a full time position at Spectrum Health as a client technology technician where I use the skills I learned from the network systems administration program.

The positive experience I've had at ITT Tech and its encouraging staff members are the reason why I decided to continue pursuing my bachelor's degree in information systems and cybersecurity.

Thank you,

(b)(6)

Matthew Francis

May 3, 2016

To Whom It May Concern,

My name is Kevin Lounsbury. I completed my Associate's degree in (b)(6) here at ITT Technical Institute, Wyoming, Michigan in (b)(6). I am now working on my Bachelor's degree in (b)(6), and will graduate (b)(6).

My experience with ITT Tech has been a tremendously positive one. By applying myself to my studies, and attending every class session, I have managed to maintain a grade point average of 3.93. Although working full-time while earning my degrees has been a challenge, my efforts have been well-rewarded. I had never imagined I would return to college at (b)(6). I assumed I'd be working dead-end jobs for the rest of my life. But attaining my degrees here at ITT Tech has proven otherwise.

I have enjoyed my classes because of the caring and dedicated attitude of my instructors. Because of the smaller class sizes, students at ITT Tech receive more personal attention, and there is more time for getting our questions answered. Compared to the impersonal atmosphere of the traditional college classroom, ITT Tech offers a much more tailored learning environment. Although the curriculum is accelerated, the opportunity to gain an excellent education is unmistakable.

I'm looking forward to walking across that stage again next June. I am proud to be an ITT Tech student.

Thank you,

(b)(6)

Kevin J Lounsbury

Kailey Stevens
ITT Technical Institute

May 3, 2016

(b)(6)

To whom it may Concern,

I was in (b)(6) and I have had several (b)(6) continuing on since then. I decided after facing (b)(6) to make my second chance at life count no matter how hard it was going to be. Because of the commercial on TV it inspired me to call the Wyoming location where we set up an interview. My recruiter was extremely helpful. He showed me that mentors were also available to help me, knowing I would need more help than others to get through college. As I was still going through (b)(6) I chose to enter the NSA field. I have been going to the ITT Tech in Wyoming since (b)(6)

The support of the instructors, staff, and administrative personnel have been simply outstanding. Struggling with my health, learning new things can be challenging and they have all worked with me and getting me help to understand everything. The books and materials we have for each course, I believe go hand in hand with each other. I have been a part time student up until (b)(6) where I switched to a full time student.

With me going through so many (b)(6) and still facing (b)(6) I honestly wasn't sure if I could make it through college. I have been very fortunate with the instructors I have had here they have all been more than willing to explain things so I understand them, and answering any and all questions whether it's in class or an email for homework. I would recommend this school to anyone. I have 3 quarters to go to finish my associate's degree and I plan on coming back for my Bachelor's degree at this Wyoming location. I am now a mentor giving back to those who need help as I did. I am making my dream come true and the staff at this school has helped in every way making that possible.

Sincerely,

(b)(6)

Kailey Stevens

ITT TECHNICAL INSTITUTE

5/3/2016

Ashlee M. Hook

Network Systems Administration Student

Associates Degree Program

To Whom It May Concern,

I am proud to be an ITT Technical Institute student. From the moment I decided to pick up the phone, like the commercial said, to this very day, my experience here has been more than I could ever imagine.

As a non-traditional student I never thought collage would be an option for me. Really, never thinking I could succeed in school. Having always been in Special Education, due to a (b)(6) my entire K-12 education was a struggle. Entering collage was a terrifying thought, but I had to try. So, I called the Wyoming Michigan campus and was connected (by a real person) to a representative named, Arthur Treadwell.

Arthur made me feel at ease about making my decision and not once did I ever feel pressured. My journey began in December 2014 and I will be graduating this Fall. Has it be easy? No, nothing worth having is. It has been hard work and I have worked hard. The course materials and tools that we have available to us have been amazing. That, along with the help of my instructors, Ms. Gort our dean, the amazing staff, and Mr. Hormel our Director, I AM DOING IT. Not only am I doing it but I'm doing so as an (b)(6) a Mentor with Highest Honors and a member of the National Honor Society.

With Great Gratitude,

(b)(6)

Ashlee M. Hook
Network Systems Administration Student
ITT Technical Institute

May 4, 2016

To Whom it May Concern:

I Graduated from ITT Technical Institute in Rancho Cordova, California at the end of (b)(6)

While attending ITT Technical Institute I received a lot of support from all staff members and teachers. Let me tell you a little about my background, I dropped out of high school at the age of (b)(6). I got involved in (b)(6) at a very young age. By the grace of god on one of my clean living times at (b)(6) I got my GED and guessed most the questions. I spent a lot of time (b)(6). So to say the least by the time I was (b)(6) which was the age I went into ITT Tech, I had lost most knowledge that I learned in grade school besides basic arithmetic. I was very honest when coming into school, telling them about my (b)(6) and past life. I chose ITT Tech as a new beginning. Every teacher I had worked with me, after school or on their lunch breaks, Helping me understand what I was learning. By the time I graduated I went from an ignorant person to highest honors Gold rope. Within 3 months after graduation ITT Tech's career services had already gotten me the interview of a lifetime, I have been with the same company ever since. I work for (b)(6) and maintain medical equipment for 45 different hospitals in northern California. Without ITT Tech and their teachers who are compassionate about teaching and actually care if their students are learning I would be in a totally different place in my life, and it probably would be for the worse.

My experience with ITT Tech is overall outstanding, I could not have picked a better school to do my studies. I have always been fascinated in electronics, but never understood how it all worked, a few teachers come to mind on spending the extra amount of time to help me understand, Ray Mesa, Raiford Hann, Dave Mosekawitz and Harry Canfield. All through my previous schooling as a child and part of high school I was told I would never make anything of myself, and I believed that until these diligent individuals. They truly changed my life and made me believe in myself. Today I feel good about my life and have accomplished goals that may have never been, from this school I have made goals that I never knew I even wanted.

In closing I would like to add the skills and knowledge that I have obtained from ITT Tech is irreplaceable, I make more money than the recruiters estimated on my initial appointment in (b)(6). My program GEET puts me in a category that does not limit me to one particular field but will help me excel in different types of positions and placements, I thank ITT for that.

Thank you for your time any questions or concerns please feel free to contact me at:

(b)(6)

Or

(b)(6)

Sincerely,

John M Raona II

(b)(6)

(b)(6)

3 May 2016

To Whom It May Concern:

I am a recent graduate of ITT Technical Institute in Rancho Cordova, California.

I have received 3 Degrees thru ITT Technical Institute. The quality of the education that I received was top notch, this is the reason I went back a second time, then for a third time. The quality of the education has prepared me to be a (b)(6)

(b)(6)

While as attending ITT I had many challenges to overcome. The Friday before my very first class on Monday, I had (b)(6). Six weeks later I had to have another one due to (b)(6). I came out of that quarter with highest honors. Then (b)(6). Five months after that I had (b)(6). A month after that I (b)(6). Without the support of the staff and class mates I probably would have not finished, but I did, and came through almost every quarter with honors.

I have recommended the school to many of my friends and colleagues.

I feel the knowledge and skill that I obtained at ITT-Tech Rancho Cordova reflect on the quality of the faculty and Degree programs.

Sincerely,

(b)(6)

Russell Allen

To whom it may Concern:

I am currently an ITT-Technical College student in Rancho Cordova California. I have been attending ITT- Tech for the last (b)(6)

I choose ITT-Technical College for two reasons the ease of attending class at night, and the quality of class's on IT Administration. I have had nothing but quality Instructors who bring real world experience to the class room. Which is helpful to those of us looking for a second career. The Instructors take you step by step on the ins and outs of IT administration. They also are willing to spend the extra time ensuring that you understand the curriculum.

Since attending ITT-Tech I have had help with resume writing, and of course how too effectively put out your resume on social media to attract jobs. I am fully prepared after graduation to confidently step in any IT role. Which will aid in me attaining a quality job. Quality job means better benefits and salary. I would highly recommend ITT-Tech to my friends in which I have, and to anyone who has the drive to accomplish a career that ITT-Tech would afford you.

I feel that the knowledge that I have obtain thru ITT-Tech has opened doors for me. I have meet a lot of good people. The Instructors are very professional and care about what they are teaching the students. So they are preparing you for success.

(b)(6)

5/4/2016

To whom it may concern,

I am a current student of ITT Technical Institute in Rancho Cordova.

The quality of education I have received at ITT-Tech has been top notch. All the instructors work in their fields and provide first-hand experience and knowledge.

ITT-Tech has helped me start to learn a new career field and gain experience while learning. I feel that I am on the right path to future employment in the IT career field. In addition, I have recommended ITT-Tech to friends and family members.

In closing, I feel the knowledge and skill that I obtained at ITT-Tech Rancho Cordova reflect on the quality of the faculty and Degree programs.

May 4, 2016

To Whom It May Concern:

I am a current student of ITT Technical Institute in Rancho Cordova, California.

I graduated with my Associates Degree in (b)(6) and now I'm continuing to get my Bachelor's Degree. I'm not currently working but I'm actively looking. By going to ITT it has broadened my computer knowledge, I love being on a computer, so It's nice to know how they work.

When I signed up to go to school here, (b)(6) came with me and made her want to come here also. So she got (b)(6) and signed up for the next quarter. And she's in her last quarter for her associate's and going on to get her bachelor's.

In closing, I'm very happy and pleased with my experience here at ITT- Technical Institute and I'm glad that I decided to go back to school.

Lorraine Jewett

(b)(6)

May 4, 2016

To Whom It May Concern:

I am in my first quarter here at ITT Technical Institute in Rancho Cordova, California

I am learning computers for the first time in my life. I am learning a great deal of computer knowledge. More than I could imagine. I'm enjoying my classes.

The reason I chose ITT Tech is because of all the classes and services they provide, for example, hands-on experience and being able to get help finding a job. I keep telling my friends and family that I'm enjoying my time here at ITT Tech. I have recommended ITT Tech to a friend of mine who is currently out of work.

I am very proud to be a student here and I'm very confident I will be able to find a new career because of the education I will receive.

Thank You,

Scott Martel

(b)(6)

To whom it may Concern:

I am a current student of ITT technical institute Rancho Cordova

The education here is good teachers are helpful you do need to do some studying on your own time.

Teachers are flexible with the student's schedules as far as homework goes.

The new hit club is helpful in getting some extra education and hands on experience.

Sincerely,

(b)(6)

Robbie Cunha

5/4/2016

To Whom it may Concern:

I am a current student at ITT Tech Institution in the Networking Systems Administration program.

So far in my career as a student I am greatly enjoying the centralized learning strategy. I really appreciate the professor's approach to teaching the subject matter. I feel like I am able to be myself and learn my own way. Foundation Strategies is a great stepping stone to teach you more about how you learn and to test and show you where you can improve in your learning style. My other class Intro to Technology studies the basics of technology and a little bit of the history of computers.

I am really excited to complete get through this program and start my job in the IT field. ITT Tech has given me a path forward to eventually pursue a career in Cyber Security. They offer a great deal of help finding hands on jobs and internships around the area. I tell my family and friends that I am so grateful to be in this type of school where I can learn exactly what I want and how I want all while working a regular job. I can't say enough about the staff support ready to answer any questions you might have.

Sincerely,

James Stark

Marcy Smith

5/4/2016

I am a current student at ITT Technical Institute in Rancho Cordova, California.

I have been attending ITT for a year, and am working incessantly towards a degree in NSA. I have achieved honors more than once as well as highest honors. I am a dedicated student, and I have 39 credits with a GPA 3.75. I have taken introduction to networking, intro to programming, database concepts, client-server networking 1 and 2 with 4.5 credits in all of those classes. I have recently just finished a new firewall installation, and am continuously achieving certs and Spe.

(b)(6)

ITT Technical Institute

(b)(6)

To Whom This May Concern,

ITT Technical Institute has been an integral part of my life as it has allowed me to be successful in my current career as a (b)(6)

(b)(6) The four years that I was a student at ITT Tech, the instructors taught with such knowledge that I was able to use in a real life scenario. Some would ask me how my Associates in (b)(6) and Bachelors in (b)(6) (b)(6) apply to my current role in HR. Each degree that I have earned, I have been able to use that knowledge in my career. In HR, I work with not only the IT part, Human Resources Information Systems, but I also work with Records and Compliance. A lot of legal knowledge goes into this role and have been able to apply what I was taught and there are many projects that I have been involved in that require me to outline the project from beginning to end.

Not only does ITT have quality instructors teaching, but they also have quality staff working the day to day operations to ensure that this school is being ran at its highest quality. The staff and instructors have been caring and honest. They understand that not only are students, but we also having other priorities outside of school. The staff works with each student to ensure that the quality of the program is not compromised and that they are receiving all of the necessary information.

In closing, ITT has allowed me to grow not only professionally, but personally. They have taught me what a professional environment looks like and what to do and not do when something is not ethically correct.

Sincerely,

(b)(6)

Beatrice C. Cortez

(b)(6)

May 3, 2016

ITT Technical Institute
National City, California

I was at a time in my life when I had to ask myself what I wanted to do with the career path I was on. I was at the top level of my current position, (b)(6) and given the economy knew layoffs were in the works. It was time to further my education and try something new. I chose to attend ITT's software development program. From the moment I walked in I felt welcomed and almost like family. The representative I had was great, Ken walked me through all the programs and process so I knew what was the best fit for me. I was fortunate and qualified for a scholarship and financing; Megan made the process so easy to understand and walked me through everything I needed to do. About one year into the program I realized computer programming was really not for me. I switched over to the business management program which was just as smooth as the day I first started. Everyone was very helpful and understanding and explained exactly how the process works and what credits would transfer over. I've been very pleased with this whole experience and it has encouraged me to grow in many areas of my life.

Thank you,

(b)(6)

Cynthia Homer

May 2, 2016

To whom it may concern:

My name is Robert Vinson. I've been a student twice at two different ITT Techs. My Associate of Science degree in (b)(6) I obtained at the Henderson Nevada campus in (b)(6) my Bachelor of Science degree in (b)(6) at the National City campus.

My experience at the National City campus was very positive. My instructors were both knowledgeable and professional, friendly and caring. Three in particular, Brian Becker, Will Dieck and Christie Joiner, were especially good. They kept their classes fun while at the same time having a great atmosphere to learn the material.

I would recommend ITT Tech to anyone looking for a career-focused college with an emphasis toward personal achievement and excellence.

Sincerely,

(b)(6)

Robert K. Vinson

(b)(6)

May 3, 2016

Jennifer Haynes

Associate of (b)(6)
Bachelor of (b)(6)

To whom it may concern:

I received my Associates Degree in (b)(6) from ITT Tech in (b)(6) and went straight into the Bachelor's afterwards, and graduated in (b)(6). I had my concerns when I first started because of all the mixed reviews and lots of negative ones as well but I knew I needed to take a chance and find out for myself if this school was for me. I learned a lot from the teachers here, who all came from the field in which they were teaching. The teachers do care about the students who put forth effort in their education. The experience and knowledge I gained from my instructors was paramount. I learned a lot, graduated with high honors, and wouldn't change that experience. I did not get a job in the specific field I was looking into from this degree, but my education here did lead me into a well-paying job at (b)(6) (b)(6). So, I am very appreciative of the education I received at this school.

Sincerely,

(b)(6)

Jennifer Haynes

Hello, my name is Akemi Bonner. I am currently an ITT Technical Institute graduate and attending student. I have completed both my associates and bachelor's degree here at ITT. Right now, I am currently enrolled in the Masters of Business program hoping to gain my master's with ITT as well. ITT has opened up a lot of doors and have given my life direction and discipline. With the help of the ITT staff and instructors, I have been able to successfully develop myself as a professional. Before coming to ITT I had attended a few local community colleges and never really felt like I was accomplishing any of my goals. I never knew what exactly I wanted to do or what career I wanted to have until attending ITT. From the first day, I was met with knowledgeable professionals who were more than willing to assist me on my journey to a successful career. When classes were tough, I took advantage of the tutoring that was provided on campus and that played pivotal role in my success in some classes. After finishing my first degree in (b)(6), I entered the information technology field, and worked on a few odd jobs that required the knowledge that I had gained at ITT.

Upon, finishing my bachelor's degree in (b)(6), I was offered a job to work for (b)(6). This offer provided financial security and stability for me and my family. I enjoy my job very much and I look forward to going to it every day. I think that is something that all professionals desire to obtain from their occupation and I am happy to have found that. ITT has been the catalyst for my growth and has provided the leverage for my growth that has in many ways positively affected my life since coming to school. Because of ITT, I am sure of the type of career I want to obtain and I know exactly what steps I need to make to get there. Without ITT, I would have never been able to reach so many heights and accomplish so many of my goals. I do thank the whole ITT Technical Institute administration for providing me with such an amazing outlook on my life and career. It is true, that with ITT all things are possible.

Sincerely,

Akemi Bonner

May 3, 2016

To whomever it may concern:

ITT Technical Institute has had a profound effect on not only the quality of my life, but that of my entire family. When I was younger, my elder brother went to ITT Tech in Virginia, and upon graduating was able to join the (b)(6) program and go on to a successful and rewarding career. Due to his positive experience at ITT, I also chose to attend ITT and have so far received an Associate's Degree in (b)(6) (b)(6). I am continuing my education with ITT Tech, currently working towards a Bachelor's Degree in (b)(6) with a focus on (b)(6). I have found the teachers extremely knowledgeable on their subjects, and also helpful and friendly. I have worked with the Federal Work Study Program here at ITT getting hands-on real world experience in addition to the academic education I am receiving.

This education has been both mentally challenging and emotionally rewarding. Based solely on the education I have received so far, I have had numerous job offers and foresee a rewarding career ahead of myself once I graduate. I am even considering continuing my education here at ITT Tech and working towards both Program Management and Software Development Degrees. If I had not chosen to attend ITT Technical Institute, I would most likely still be working dead end menial jobs with little or no hope for improvement. ITT has given me hope for my future and a sense of belonging.

(b)(6)

John Mathews

National City
039

I am the most successful I've ever been in my life, and I owe my accomplishments to ITT Technical Institute. Working as a Federal Work Study in the Career Services department prepared me for the job I have now, in the (b)(6). I am able to be a top performer in my company, and the quality of the courses prepared me for that. I am also thankful for the staff and instructors for their integrity and motivation. I have had the best instructors and managers here at ITT Technical Institute, whom I still look to for guidance towards my future and professional development.

Mary Trefero 05/03/2016

(b)(6)

With ITT-Tech I am able to lay a foundation for my career path because of the quality instructors who have in field experience, the integrity of the staff who understand how important education is and the knowledge and insight I have learned here which made a difference in my life. I am currently a full time student in the Bachelors program and working full time in my field thanks to the help of Career Services. These steps forward will give me the moment I need to make longer strides as I run my race to accomplish my goals with my career and my life.

Lester Laynes 05/03/2016

(b)(6)

May 4, 2016

Shortly after I turned (b)(6) I had my (b)(6) so I decided it was time for me to finally do the things I had wanted. I left behind a job I had for over 6 years to move to Florida. I always wanted to get my degree and I had tried several times but never was able to finish.

I looked at ITT Tech in Tampa within weeks of arriving in Florida and I enrolled right away. I found ITT much easier to have to enroll in and continue because they make your schedule for you. Other schools make you pick out your classes and you are left to juggle what classes you will be able to attend and still hold a job. At ITT the classes always start at the same times every semester. Going to class 3 nights a week or on a Saturday morning is something I was able to do and still make ends meet.

The classes at ITT are small enough to be able to get the help you need to learn the material and being able to get a degree in 21 months was a goal that was obtainable.

I am 3 weeks away from completing my degree in (b)(6) and I have a 3.92 GPA. Career services at ITT has also assisted me with finding my new career. I have now been employed as an (b)(6) for the (b)(6) I love what I do and I look forward to going to work every day. ITT has given me the skills I need and I am proud of what I do.

Sincerely,

(b)(6)

Deborah Livesey

My ITT Tech Story
Roberto Guerrero
5/2/2016

(b)(6)

A large rectangular area of the page is redacted with a solid yellow fill. The redaction is outlined with a thin purple border. The text "(b)(6)" is located in the top-left corner of this redacted area.

Famous filmmaker James Cameron is quoted to of had said, "If you set your goals ridiculously high and it's a failure, you will fail above everyone else's success." It's this type of overachievement mentality that has helped me achieve success in my life. I have always strived to hold myself to a higher standard. This was something that was founded in my High school Athletics and refined in (b)(6) I quickly learned that "competition begins when everybody else has given up and you are in competition with yourself."

After 8 years of (b)(6) and traveling to many countries in between I was ready to continue what I started with my education. After my (b)(6) I enrolled into ITT Techs' Computer Network Systems Associates Program. Shortly beyond a year of enrolling I had to make the tough decision to continue my education or pursue my professional career ahead of schedule. (b)(6) (b)(6) it was my responsibility to be there for them as a (b)(6) I was able to get my foot in the door in corporate America as a (b)(6) I was able to rise up the ranks as a (b)(6) (b)(6) and currently as a (b)(6) for one of the most prestigious international companies in the United States, (b)(6) Once my (b)(6) and I had found stability with work and family, I re-enrolled to ITT Tech to finish what I had started. Even though I had found the best career I could have ever of hoped for, I knew that I had bigger plans and those involved staying relevant and technically savvy in my industry of choice. ITT Tech gave me the schedule

flexibility of attending evening classes which opened up opportunities to also become a Pony League Baseball Coach, which has strengthened the (b)(6)

(b)(6) Recently I graduated from the (b)(6) Associates Program with highest honors and am enrolled in the (b)(6)

(b)(6) Bachelors Program at ITT Tech. Working in my industry since (b)(6) and filling billets in every area of IT Infrastructure I can validate that the programs are relevant to real world concepts and methodologies. ITT Tech can be the best experience for anybody wanting to further their careers. Coming to class is just one part of it, I found that being enthusiastic and engaging in classes allowed me to really take control of my education.

My goals don't stop at the Bachelors program. That is just a milestone in a lifelong commitment that I have made to myself to never cease the learning process. Hopefully I can be an inspiration to my family and friends. Remember, actions speak louder than words.

May 2, 2016

To Whom It May Concern:

I started attending the Networking Systems Administration program in Pensacola only to (b)(6) and move further south. I was happy to realize that I could continue my degree at the Saint Petersburg campus that unfortunately closed its doors. But, I was still close enough to attend ITT Tampa campus where I complete my Networking Systems Administration program in (b)(6)

Overall, I have a very good experience at ITT Tech, most instructors are very engaging and brings to the class real world knowledge that holds the attention of the class, and all instructors seemed to love what they do. One of the best aspects is all work has clear objectives so you always know what is due when even if you miss a class. And ALL instructors are always available if you have questions through email or phone call.

As an ITT graduate I was able to get a job as an (b)(6) at one of the local employers where my skills that I learned open the door to a more successful career and has many avenues for progression. I believe the knowledge and skills that I learned during my education help demonstrate the integrity and quality of their staff, faculty and academic programs. As an ITT graduate I'm proud of the quality of the education I received. Thanks to the administration, faculty and academic support systems at ITT Tech, I am better prepared to take on the challenges of what the IT field has to offer.

For example, in the (b)(6) I have been working as a contractor I was able to get promoted and have the opportunity to be hired on as a full time employee. This is what I was attending ITT for, they provided the necessary skills I needed to excel in this ever growing field. Without the attention from my teachers, career counselors, this would not have been possible. I recommended the school to (b)(6) while I was finishing my program, so he enrolled in the Networking Systems Administration program and just graduated (b)(6) out of the Montgomery Alabama campus.

Thank you for the opportunity to describe my personal experience in obtaining a quality education at ITT Technical Institute.

Peter Woledge

(b)(6)

Jorge Rivera

ITT Tech Tampa Florida

(b)(6)

Associates Degree

To whom it may concern:

The purpose of this letter is to talk about my success at ITT Tech Tampa. First I like to thank the staff if ITT, from admin, finance, front office and Teachers. I work full time and have a (b)(6) I express my gratitude to ITT for working around my schedule to accommodate for all my needs. I am also (b)(6) I thank ITT for helping take care of all financial and admin issues with the VA department. My experience at ITT has been a good time, always a challenge but never the less exciting.

I currently work for (b)(6) which is a civil engineering firm. Including Land survey, Civil design, and Environmental services. I use ITT techs skills learned to be a professional and outstanding employee, working with CAD Civil 3D and many other software's learned in the drafting and design degree. I have been out of school for more than ten years and it was quite a refreshing training and preparation to the world of business.

Thank you for your time,

Jorge Rivera

(b)(6)

May 5, 2016

To Whom It May Concern,

My name is Wilferson Simbert and I graduated from the Associates of Science in (b)(6) program at the Tampa Florida campus in (b)(6). Currently, I am pursuing my Bachelors of Science in (b)(6) (b)(6)

Currently, I am employed as a (b)(6) in Tampa, Florida. In this position I work on the shuttles and monorails for the Tampa International Airport.

I would say that the PLC class I took prepared me for this position as it focused on programming logical controllers. One of my favorite instructors said something to me that I will never forget. He said, "You're the technician, figure it out". He was basically giving me the power to do it and I felt more confident that day. I am very motivated to further my education beyond my Bachelors as well.

Thank you.

(b)(6)

Wilferson Simbert

May 5, 2016

Leighann Winchester

(b)(6)

To Whom it May Concern;

I graduated from ITT Technical Institute in (b)(6) with my Associates of Science Degree in (b)(6). I have since gone on to pursue my Bachelors Degree in (b)(6).

Currently I work at (b)(6). Looking back at the classes I took in my Associates degree program, I appreciate the courses I took and how the teachers and staff have encouraged me to do the best that I can.

I've been able to keep my GPA up and was awarded the Opportunity Scholarship which has made school much more affordable for me. I liked the flexibility that the evening classes at the school provided. This allowed me to work a full time job and also continue my education, while still having time for my family.

My instructors were essential to my education. Mr. Fleeting always made my classes entertaining and engaging. His teaching style allowed me to develop my IT skills. I enjoyed the foundation he provided. I also enjoyed Mr. Overton's Client Server Networking II and Intro to Linux classes. He brought in so much knowledge from the field and allowed us to work on real world scenarios. The instructors were friendly and relatable; most importantly they made learning fun. The hands on environment helped me use what I learned in everyday life and allowed me to take what I learned in the class room and use in my career.

I look forward to the opportunities ITT Tech will provide me in the future.

Sincerely,

(b)(6)

Leighann Winchester

Student #: (b)(6)

To whom it may concern,

I am an ITT Tech alumni from the San Dimas campus. I attended this school from (b)(6)

(b)(6) During my time here, I was able to learn much from teachers such as Mr. Will Yang (Chair, School of IT), Mr. Tran Long, Mr. Edward Robinson & Mr. Manuel Green (All instructors within the ISC & NSA programs). These instructors stand out, because they are great teachers who ensure they take time with all students in class.

Sincerely,

Adam Wolfe

(b)(6)

May 3, 2016

To whom it may concern

FROM: Perrin Hamilton, Alumni; San Dimas Campus

I was accepted to attend ITT Technical Institute, in the (b)(6). The first thing that caught my attention, was the Administrator's and how they welcomed me into the ITT Technical Institute family from my very first day on campus (b)(6) until the completion of both my Associates, and Bachelors of Science Degree Program's. Today, I am very knowledgeable in the field of Information Technology, as a direct result of Mr. Rick Hoke, Director and Mr. Jan Memmott, Dean of Academic Affairs and the ITT Technical Institute facility and staff.

Most recently, as a result of my education and the assistance of the Career Services Department I have accepted a full time career opportunity with (b)(6)

(b)(6) In closing, the start of a solid career only begins with a solid educational foundation, that institution is ITT Technical Institute, San Dimas CA.

SINCERELY

(b)(6)

May 3, 2016

To Whom It May Concern:

I'd really like to share my story about why I decided to attend ITT, San Dimas. I have been out of school for quite a few years, but always said one day I will get me degree. It was in (b)(6) I had my (b)(6) (b)(6) not doing anything with his life, I decided to give him three options; otherwise, he was going to need to consider making other arrangement with his living quarters

(b)(6) decided school, so we made an appointment to visit and see what ITT-San Dimas had to offer, well as I started looking at what the school had to offer for (b)(6) I was like this is for me. I was really amazed and excited. A week went by and the orientation remained stuck in my head. I decided to make another appointment before I knew it I was attending ITT-San Dimas.

First day of school, was an awesome feeling; the staff were so friendly, we took our student ID pictures and the Dean came in to the class room to talk about what education can do for you, we also had refreshments. It was one those days that I will never forget.

In (b)(6) I will graduate with my (b)(6) degree and so THANKFUL to the instructors, administrators, career services, financial aid representatives and the Dean and Chair of ITT-San Dimas that supported my efforts in making my dream come true – GRADUATE! The instructors make sure that your understanding the program class syllabus, if not, they will sit with you, until you do. What more can you ask for? Who needs stress? I will be returning to ITT-San Dimas for my Bachelors Associate, because I feel that I am NOT just a student but family.

I seriously recommend ITT-San Dimas to everyone, young and old that seriously wants to improve themselves in education. We work as a team in class, the instructors promote this, and it's a great feeling!

We also get recognized as good students, which we have popcorn days, hot dog days, and more, we are a family!

Sincerely,

(b)(6)

Student, Carmen Camacho

#(b)(6)

MAY 2 2016

TO WHOM IT MAY CONCERN:

I am writing to discuss my experience while attending ITT Technical Institute in San Dimas, CA. As a Graduate of (b)(6), I am proud of the quality of education I have received. The staff at ITT has more than met my needs as a student, working with me instead of against me on many projects, and having patience to explain things when I got stuck or didn't fully understand the course material.

I'm currently working in my field of study of ISC for (b)(6) as a (b)(6) with plans to move up into (b)(6) in the near future. I would not have the position that I have today if it weren't for the unfailing support of the career service center here on campus. My career service representative, Dianna Diossi, has been not only a representative, but also a mentor and guide while undergoing my studies here at ITT. She not only helped me find a suitable career for me, but she did not give up on me, and was/is always there to give me advice and guidance regarding my profession outside of school, as well as help make my resume stand out against all the others.

When I first came to ITT, I had many questions and doubts about where I wanted to be or what I wanted to do with my life. The ITT recruiters were kind and patient with me, outlying all the different paths I could take, and answered all of my questions regardless of how many I railed them with. I owe them, first, for helping me choose my field of study and helping me lay the path to my eventual success at ITT.

Throughout my 3.5 years of schooling, I've had many different instructors, some more than others, but I can honestly say that all of them are more than qualified to teach the curriculum. They are always willing to help out their students, and have an open door policy that

most other Institutions don't have. I honestly feel, now, after I've graduated, that I can walk into my old instructors office and they will be willing to help me if I have any issues, as well as advise me on real-world issues I may come across in my professional endeavors.

The curriculum has been very educational and I can honestly say, the things I've learned in my classes, I'm applying to in my real job. Because of my hands on experience with Microsoft Server and active directory, I'm able to quickly identify it in my job and it provides me a small edge over people that have never seen AD before. The labs utilizing the Virtual Machine were exceptionally helpful in coming across issues related to Exchange Server and Active Directory that provided me with a unique glance into the software. The fact that I can use that knowledge I learned in the lab and apply it to my job is something that I could only have attained at ITT Technical Institute.

I can honestly say, that if asked where I learned the technical skills that I did, I can tell them that I learned at ITT Technical Institute, and enrolling in this school has been one of the best choices I've ever made for myself.

Signed:

(b)(6)

Erik Bekke

MAY 2 2016

Hello, to whom it may concern

I am writing about the letter of support to you, my experience in Career Service has been great every single one of you have been outstanding helping me get my job I have today. One thing I really like is you don't forget who I am most people meet you and forget especially at a school were you seeing a bunch of students each year. Of course I like to come in and say hi every once in a while but that's because I enjoy being around there it probably my favorite place to go once I get on campus cause you guys care about us. I am currently a graduate from the San Dimas campus; I am employed at (b)(6)

(b)(6) My positive experiences are the people I met that will be long lasting friends and the teachers and of course career services if it wasn't for you I wouldn't have a job. I would just like to say thank you to you Dianna and to Martha as well thank you for everything you have done and for helping me through my journey at ITT Tech.

From: Phillip Delacruz

Monday, May 02, 2016

To whom it may concern,

My name is Jeremy Agrusa, A current student at ITT-Tech in San Dimas California. I graduated with an Associate Degree in (b)(6) and am continuing my education in Cyber Security. I am currently an employee with the (b)(6) as a (b)(6)

During my time at ITT-Tech I have gained knowledge in multiple areas of my profession that assist me during my daily activities at work and in my personal life. Using the information from my classes Problem Solving Theory and Advanced Strategies for the Technical Professional, I have created my own knowledge base of troubleshooting techniques to assist me while working out unsolved problems at work. I utilize my lessons from Client Server Networking 1&2 to assist in the management and organization of domain devices and user accounts across the district. After taking my class in database I created databases to track and support multiple schools and over 50,000 student device. I learned to maintain a cisco network which allows me to communicate with our Networking Department and assist in remote troubleshooting.

The Career Services department in ITT-Tech San Dimas has been an invaluable resource for me during my time at this school. Dianna DiOssi was there for me and assisted me multiple times while I was applying for my current position. I feel my application for was more relevant to the position after she looked it over and helped with editing small errors that I had missed. She is in consistent communication with my employment and I, checking my progress. I have also had a positive experience with the Schools Registrar who worked around my schedule. I value the experience and knowledge provided me through teaching staff such as Mr. Robinson, Mr. Tran-long, Mr. Yang, both M. Gonzalez and Mr. Ramirez. They made many of my classes enjoyable as well as educational and am grateful to have taken their classes.

Through this school I have developed a large network of contacts and support that I will value, utilize and reciprocate.

Thank you for your Time,

(b)(6)

To Whom It May Concern:

I am writing you this in regards to my experience at ITT-Technical Institute on the San Dimas location. I am a current student that will be graduating with my AS in (b)(6) and will be continuing my education obtain my BS in (b)(6). I am currently employed as a (b)(6).

On my first day of school I walked into the Career Services office to formally to introduce myself, I met Dianna DiOssi and let her know she will be seeing me a lot through my time here at school. Since then she has helped me improve my resume, improve my interview skills, and help me build my confidence when in the process of looking for a job.

I enjoyed all my time at school from the administration to the faculty. My personal favorite teacher in Mr. Tran whose knowledge and care for teaching Information Systems appears endless.

He along with everyone in the building made sure I got whatever resources I needed to complete my class and graduate with a 4.0 GPA. That is something I have never had and am truly proud of, I can only thank my wife, my daughter, and especially ITT-Tech for my success

Sincerely,

(b)(6)

To Whom It May Concern,

I am writing to discuss my experiences while attending ITT- Technical Institute, San Dimas Campus. I am a current full- time student at ITT- Technical Institute in San Dimas, CA. I am studying in the Bachelor's program in (b)(6).

I am proud of the education I am receiving while attending for the BA- (b)(6) (b)(6) program.

The first experience, was while finishing up my Associate's Degree I was unsure if I should continue with the Bachelor's Degree. My representative, Saj, took the time out of his schedule to answer important questions about the program and any other questions that I had about the school. It was because of this discussion with him that I continued with my education. I have never thought why am I still attending or why this campus?

The second experience, was in the Career Services office. With all the worrying over if I am going to find a position in the field I'm studying or if my resume looks okay. If there was a question I had or if I needed changes to my resume they answered my inquiries without making me feel out of place.

The third experience I have is the teachers are always available by phone, text messaging or emails when I the student have a question or need tutoring. The teachers and their knowledge of the field are helpful when in classes about subjects I have never heard of. It is always a plus when the teachers break down an assignment to language I can fully understand.

With these positive experiences I will always recommend this campus.

Sincerely,

(b)(6)

To Whom It May Concern:

I have worked for (b)(6) now for (b)(6) and believe that ITT Tech played a large part in preparing me for the challenges that I have faced. From troubleshooting circuits to repairing circuit board level components, ITT gave me the skills and knowledge to not only be prepared for my job, but also to excel in my career. I am very happy with the education I have received, and am currently receiving. I hope in the future I am able to give back all that I have received.

To Whom It May Concern:

Since I started going back to school at ITT Technical Institute I have felt that I can relate more to my co-workers about electronics. I am an (b)(6) so the classes I take are very relevant. There are some technicians that I looked up to so I knew I can impress them with a Bachelor's Degree in (b)(6) It's always a pleasure to come to class every day and the instructors are always helpful. I know that when I have a question about the subject that I will get more than I asked. I am looking forward to finishing my degree here and I know that I will always stay in touch with this school.

To Whom It May Concern:

Since my enrollment at ITT Technical Institute, I have been better at processing many things better than before. My instructors call and check up on me. The material that I'm learning I couldn't understand in my previous learning experience at Tri-C. We always communicate and the staff is very nice and always ask where you are, and if you need assistance. I was scared to enroll but after 2 quarters, I'm on my way to the Dean's list. I am happy and proud to be a member of this learning community.

To Whom It May Concern:

I have been attending ITT for the past 3 years where I have already received my Associates Degree in my field. I am one quarter away from getting my Bachelors, which hopefully I will be graduating with a 3.97 GPA. While attending ITT, I have been fortunate to have some of the best instructors along the way to help teach and challenge me. I think for the most part, all the instructors do a good job presenting and teaching the information so that we can understand.

To Whom It May Concern:

The first thing I was impressed with was the admission process. Fricda helped me completely with the admissions process. I had been to three other schools and did not get that support. Since I've been here, staff have continually made themselves available and answered all of my questions. Faculty have been supportive and have allowed me to learn more deeply by being present and willing to help. ITT-Tech is my Harvard and I am going to make this work with the staff and faculty. I always recommend ITT-Tech to others who are interested in the nursing program and those that who are smart enough to take my advice, will be completely satisfied.

To whom it may concern:

I'm contacting you to let you know that as a current student majoring in the Associate of (b)(6) (b)(6) I am pleased with my curriculum, for it is allowing me to learn new technical skills that will assist me with getting a job in my field.

Career Services has assisted me with a short-term assignment as a (b)(6) position with (b)(6) which has given me hands on experience working in my field of study. Currently, they are assisting me with finding another position prior to my graduation.

Our instructors are very helpful and work with me, so that I can complete my assignments. I feel the curriculum will assist me with being successful to start my Engineering career.

Sincerely,

(b)(6)

Troy Artis

To whom it may concern:

As a graduate of ITT Technical Institute with my Associate of (b)(6), I feel the courses I took prepared me for my first job as a (b)(6). I feel my Program Chair, Mr. Fassih prepared me with the skills I needed, such as circuit reading, measuring, reading resistors, PLC Technology, and generators and motors. On (b)(6) I will start my first job in my field of study, and I have also returned to ITT Technical Institute, Warrensville Heights to obtain my Bachelor's Degree in (b)(6) which will only strengthen my skills and make me more marketable in the community.

Sincerely,

Jerold Hall

(b)(6)

May 3, 2016

To whom it may concern:

As a (b)(6) Graduate, I obtained a position working with (b)(6) which gave me my first experience in the Drafting field of study. I feel the curriculum prepared me for my first job in drafting. Also, the instructors taught me practical viewpoints of application to design and development in various industries, such as architectural and mechanical.

Career Services provided the drafters with additional workshops which was critical to making the drafting students more marketable within our community. Career Services has continued to work with me, in order to obtain a second position in drafting.

Sincerely,

(b)(6)

May 2, 2016

As a graduate with an Associate's Degree in (b)(6) I feel the courses taught prepared me for my current job as a (b)(6)

The classes and instructors through the curriculum prepared me to be able to work in my field of study. Instructors assisted me with my courses as needed in order to be successful in my school work, and were easy to approach for anything I needed.

I would recommend any student to attend ITT Technical Institute as their college of choice.

Sincerely,

(b)(6)

Jermaine Ross

Education and Experiences as a Student

Michael Fulkersin

(b)(6)

ITT TECHNICAL INSTITUTE

As graduation nears and my continued experience in the work force expands, I see that the opportunities are endless and the skills, knowledge, and one on one training that I have received over the last 4 years has allowed me so many different opportunities.

My name is Michael Fulkersin, I have been attending ITT Technical Institute for the past 4 years.

I started my education journey after I left (b)(6) with no idea what I wanted to study, and what I wanted to set my goals to. Prior to starting school, I spoke with many different friends, co-workers, recruiters (From ITT Tech) and made the determination to begin school with ITT Technical Institute in Arlington Texas, still with no field of study in mind. I was approached by a Recruiter (Mary Hibbets) over the phone and she asked me to come in so we could sit down and talk about career goals, and what all my interest are. After a full day of speaking with Mary I then talked with spouse about all the possible avenue's I can take and we quickly decided that getting my education will be very important in the workforce, but also being a role model for my children, and friends.

From the time I walked in the doors at ITT Tech I was welcomed by all staff, "How can I help you, let me take you to your class, do you need anything else, etc." One very important department that has supported me throughout my journey whether it be career searches, resume tips for success, mock interviews is "Career Service." I have seen a few career services personal come and go, however I have taken the time to introduce myself to each one of them and explain to them my goals, achievements, and they have bent over backwards for me. I have to say the least that without career services and their support I would not be where I'm at today. Thank you to Mrs. Belinda (Director of Career services) and Ms. Laronda for the continuous support and pushing me to be the best.

Secondly there are so many other departments that I would like to mention, however I would be writing for days. Finance thank you for staying 2 steps ahead of me making sure that all the money was taken care of in a timely matter. Recruitment, you all are the best without you all we would be empty!!!!

In conclusion I would like to mention that I have seen ITT Tech go through many changes, but currently I personally believe that ITT Tech in Arlington Texas has one of the best Leadership teams (Gregg Falcon Director of School, and Dr. Joe Dean of Studies). As long as we continue to show improvement, and giving the students present and future all the preparation we can I believe that each student graduating from ITT Tech will be successful in any decisions that they make.

Sincerely,

Michael Fulkersif

To whom this may concern,

I am currently a student at the ITT Technical Institute located in Arlington, Texas. I am very thankful, that I was able to attend this astonishing school. I first attended ITT Tech Technical Institute in (b)(6) (b)(6) was my major, which I graduated from in (b)(6). I am now continuing my education with ITT Technical Institute for my Bachelors in (b)(6) (b)(6) soon to graduate in (b)(6)

Attending ITT Technical Institute was an amazing experience for me. I received the knowledge that was a necessity for my major, became better acquainted with the staff and teachers, and also was able to be a part of great clubs. Whenever I needed help or have a question the staff and teachers could always help me.

I greatly appreciate the Financial Aid and team for helping me enroll and help me throughout the years on keeping me up to date with my Financial Aid information.

My entire time at ITT Technical Institute was amazing. I would highly recommend this school to any one I meet.

Sincerely,

(b)(6)

Marquente Grant

To whom it may concern:

5/3/16

My name is Michael Hill. I have been a student here at ITT-Tech since (b)(6). My first few weeks was so fast paced, but the faculty here at ITT-Tech helped me get through those times. I am really glad that I chose this facility because from day one the staff here has taken the time to make me feel like I matter the most. Whenever I had a problem they took the time to help me, and help me to solve my problems. They have always given me good wholesome advice and followed up to make sure that I was on the right track. The instructors are so knowledgeable about what they are teaching. Most of all they seem to know when to stop and make sure all the students are on the same page. I look forward to Cumming to class so I am here every day. I am glad I am doing my training at ITT-tech.

To Whom It May Concern:

I am very grateful to ITT Technical Institution at Arlington, Texas, because it has given me all the necessary support for studying this career of electrical engineering and communication. Through ITT Tech, I got a good job in which I'm using everything I'm learning and I'm training more professionally.

I'm very content at ITT Tech because they have qualified instructor for this school. The Instructors are professionally prepared to teach materials professionals. I like that we have all the equipment necessary for laboratories both in electronics and computer labs and this helps me in all my preparation and also helps to develop my career.

I am happy with the financial support offered to me and being able to finish my career without any concern.

Sincerely,

(b)(6)

Reyes Tello

To Whom It May Concern:

I am a current student at ITT Technical Institute in Arlington, Texas. I am studying (b)(6) and will graduate (b)(6) with an associate's degree. I am very satisfied with the program curriculum at ITT Tech. I am learning a lot in all my electronic classes and I am having hands-on experience which is very important to me.

The instructors at ITT Tech are very academically sound and very helpful. I like the way they explain each class and the methods they use in order for the students to understand. The instructors are very open and help you understand the aspects you need help on. Also I like the way the staff at ITT Tech is very helpful and are always there to support you. I know that at ITT Tech I will achieve my academic goals and it will help me grow personally too.

Sincerely,

(b)(6)
